FACTORY OF THE GLOBE-WERNICKE COMPANY

Floor Area
35 Acres

THE LARGEST PLANT OF ITS KIND IN THE WORLD

Ample factory facilities mean more than the mere prestige of Bigness.

The ability to secure the patronage of those depending on Service, as well as Quality and Reasonable Prices, is the most important factor in building up the reputation of the Dealer.

The retailer whose experience has not assured him that the manufacturer is capable of handling business on a large scale, lacks the necessary confidence in dealing with his own customers.

If he can not command the trade of the larger consumer in his community, he naturally does not enjoy the lucrative business that he would if he represented firms having ample capital and facilities to promptly supply his needs.

The agent for *The Globe-Wernicke Co.* regards our factory in the same light as his insurance policy—a guaranty against possible loss arising from vexatious delays which jeopardize his opportunities for developing a profitable business.

The resources of this factory are so enormous that we are accustomed to handling carload or trainload orders with equal facility, so that prompt shipments are the rule and not the exception.

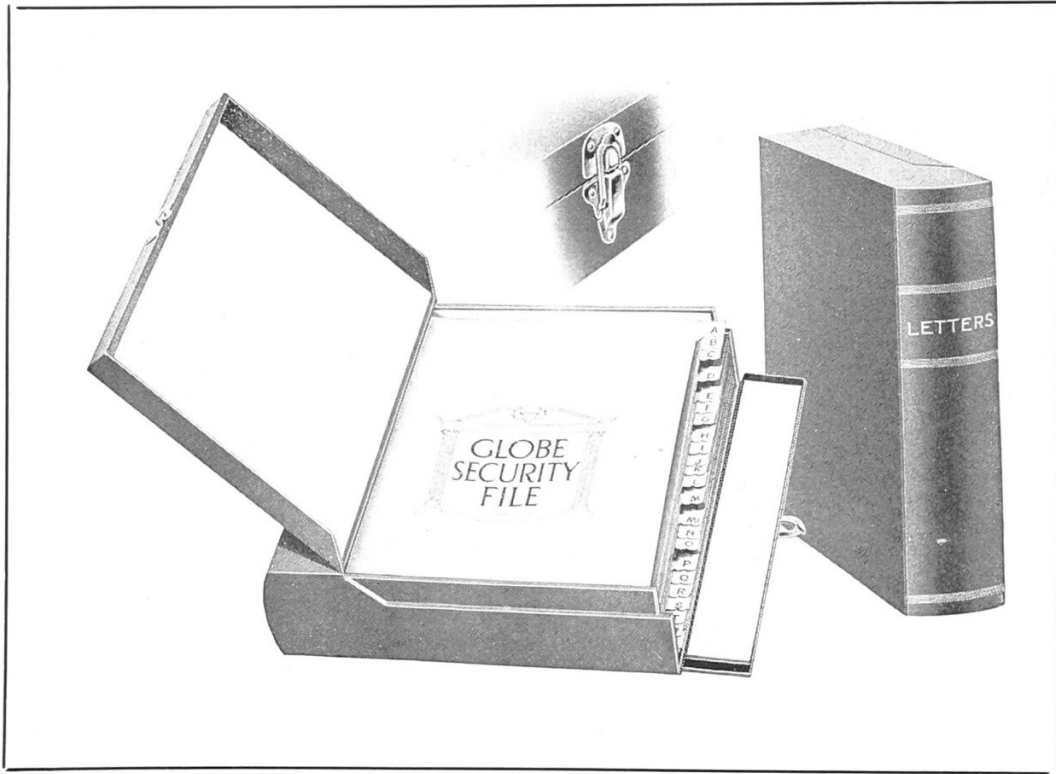

Any deviation from stock styles or sizes shall be subject to extra charge and all such and other special work is not subject to cancellation.

Although we endeavor to manufacture the exact quantity of special goods ordered, it is sometimes impossible to do this and therefore any shortage or excess in count varying not more than 10% of the quantity must be accepted by the purchaser.

THE SECURITY FILE

No. 30

Patented Oct. 6, 1903.

A high grade dust-proof Box File. Constructed of the best material throughout, being covered with a black leatherette—back printed in gold. The index leaves are made of Nearleather (tough red rope) stock, index tabs of cloth. Brass finished Suit Case Lock.

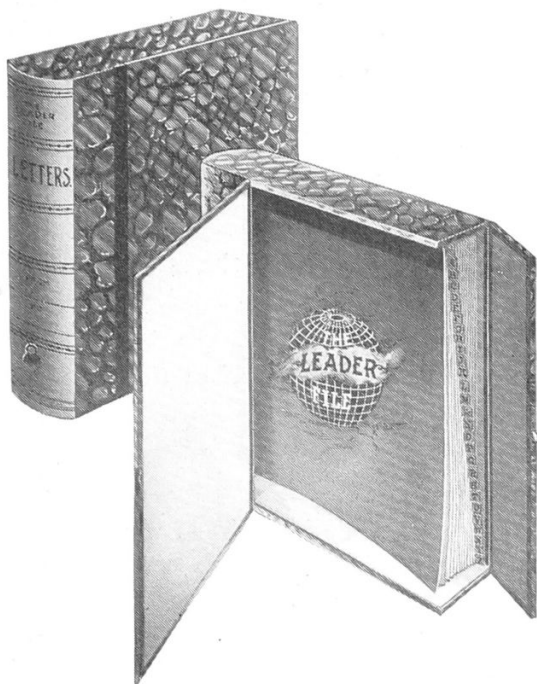

This file is built to meet the demand for a private file to hold all personal papers and correspondence. Made with alphabetical index only—twenty-four leaves. Made up with dealer's imprint on index cover only, at no additional cost in one-half gross lots.

No. 30, Letter size, $10\frac{7}{8} \times 11\frac{5}{8} \times 2\frac{3}{4}$ inches inside, Marked "Letters"

Packed one dozen to a carton

Shipping weight, 360 pounds per gross.

SEE PRICE LIST

THE LEADER FILE

Patented Oct. 6, 1903

Constructed of seasoned wood and heavy tarboard. Covered with blue marbled paper and imitation leather back. Index is of strong manila, with projecting tabs of cloth. Each sheet is reinforced and fastened in the file with two index pins. Leather pull on back.

No feature has been omitted to make the file live up to its name. Made with 24 leaf Alphabetical or Monthly Index (December to January).

No. 1, Letter size, $10\frac{7}{8} \times 11\frac{5}{8} \times 2\frac{3}{4}$ inches inside, Marked "Letters".
 No. 1-C, Cap " $10\frac{7}{8} \times 14\frac{1}{2} \times 2\frac{3}{4}$ " " Marked "Invoices"
 Packed one dozen to a carton.

Shipping weight, Letter 360 pounds per gross.
 " " Cap 435 pounds per gross.

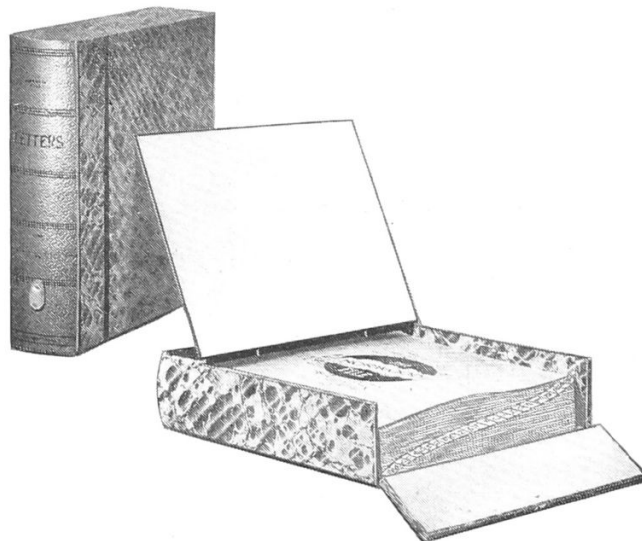

THE NORWOOD FILE

Patented Oct. 6, 1903

In grade this file is next to the LEADER. Constructed of seasoned wood and heavy tarboard. Covered with blue marbled paper and imitation leather back. Strong manila index, with projecting tagboard tabs, held in place by two index pins. Leather pull on back.

On orders for one gross or more of one size it will be made under some other name, if so desired, and with dealer's imprint at no additional cost.

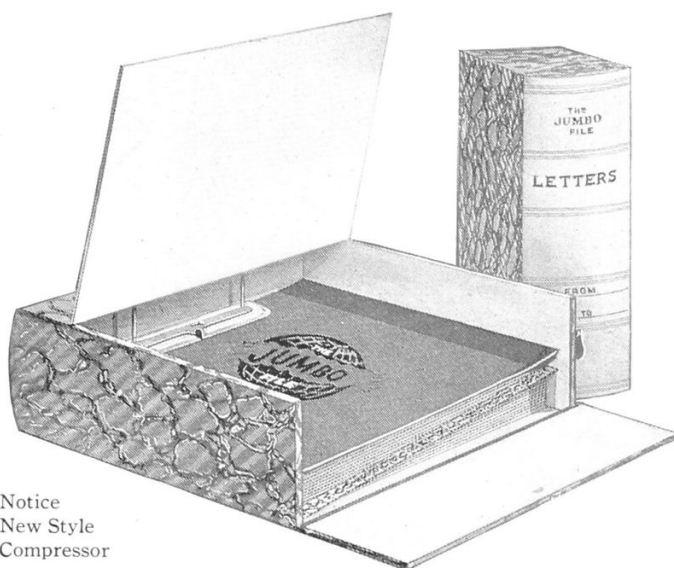

Made with 24 leaf alphabetical index only.

No. 29, Letter size, $10\frac{7}{8} \times 11\frac{5}{8} \times 2\frac{3}{4}$ inches inside, Marked "Letters"
 No. 29-C, Cap " $10\frac{7}{8} \times 14\frac{1}{2} \times 2\frac{3}{4}$ " " Marked "Invoices"

Packed one dozen to a carton.

Shipping weight, 325 pounds per gross.

THE EXTRO FILE

Patented Oct. 6, 1903

Same as the EXCELSIOR except that it has one post for index instead of two.

A low priced substantial file fitted with a strong manila index. Attractively covered with red marbled paper and imitation leather back.

Furnished with 16 leaf alphabetical index.

Leather pull on back.

On orders for one gross or more of one size, it will be made under some other name, if so desired, and with dealer's imprint at no additional cost.

No. 25, 1 Post, Letter Size, $10\frac{7}{8} \times 11\frac{5}{8} \times 2\frac{3}{4}$, inches inside, Marked "Letters"

Packed one dozen to a carton.

Shipping weight, 325 pounds per gross.

SEE PRICE LIST

THE CYCLONE FILE

Patented Oct. 6, 1903

Is the same file as the VICTOR, excepting that it is covered with a DRAB GLAZED FIBRE paper. This is the best file ever put on the market at the price.

Leather pull on back.

On orders for one gross or more, it will be made under some other name, if so desired, and with dealer's imprint at no additional cost.

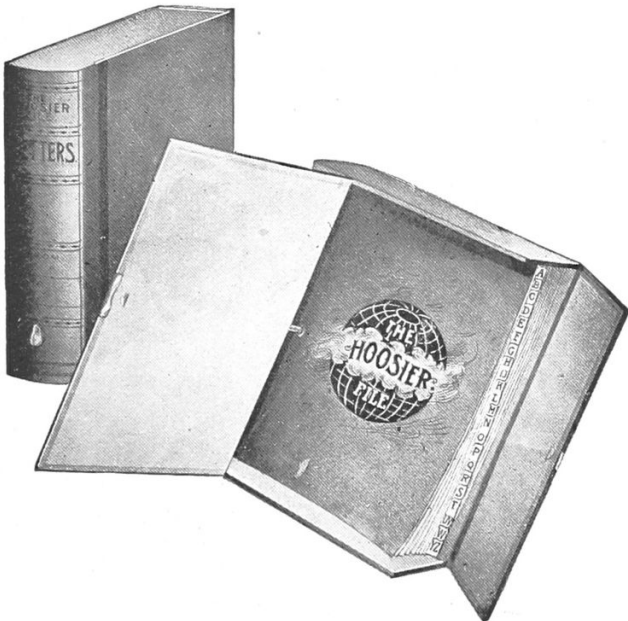

Furnished with either a 16 or 21 page alphabetical index, or with monthly index.

No. 13, 16 Leaf A-Z Index Letter size, $10\frac{7}{8} \times 11\frac{5}{8} \times 2\frac{2}{3}$ in. inside Marked "Letters"
 No. 15, 21 " " " " $10\frac{7}{8} \times 11\frac{5}{8} \times 2\frac{3}{4}$ " " Marked "Letters"

Packed one dozen to a carton.

Shipping weight, 325 pounds per gross.

THE HOOSIER FILE

No. 11

Patented Oct. 6, 1903

A neat, thoroughly well made box file. The best on the market at so low a price. Covered with hard finished brown fibre paper, has good fastening and a strong manila index. Leather pull on back. Manila index held in place by ONE pin.

Furnished with 16 leaf alphabetical index.

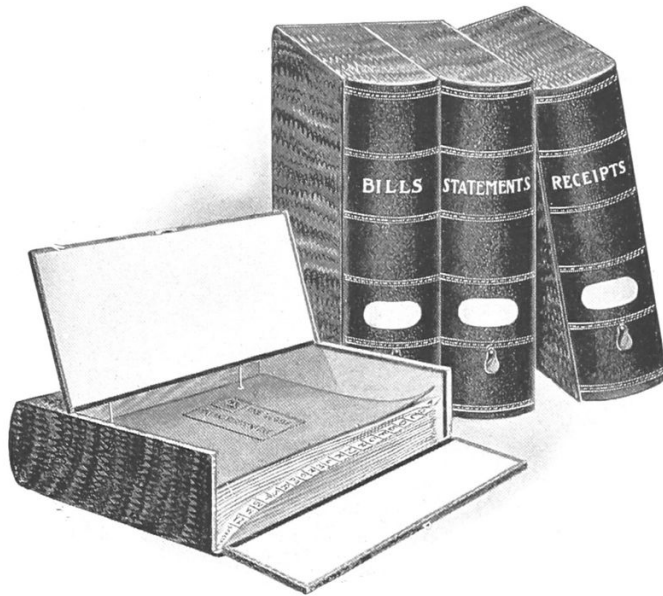

On orders for one gross or more, it will be made under some other name, if so desired, and with dealer's imprint at no additional cost.

BILL FILES

Patented Oct. 6, 1903

Constructed of wood and tarboard, neatly finished, covered with marbled paper and imitation black leather back. Strong manila index, with projecting tabs, held in place by two index pins. Titles printed in gold. Labeled "Bills", but each file contains a title-strip printed "Statements", "Receipts", so that title may be changed.

Bill Head or Note sheet size

10¼x7¼x2¾ inches inside

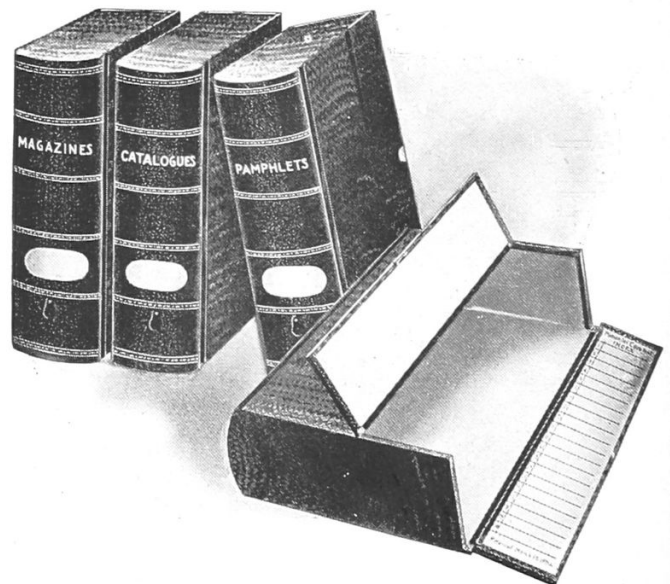

Packed one dozen to a carton.

Shipping weight, 240 pounds per gross.

PAMPHLET CASES

Constructed of wood and tar-board, neatly finished with marbled paper sides and imitation black leather backs. Titles printed in gold. The index record as shown in illustration, will be found very convenient for memorandum purposes. Excellent for filing pamphlets, booklets, thin catalogues, etc., and a much cheaper and more convenient method of keeping them than having them bound. Labeled "Pamphlets". Each case contains a title strip printed "Magazines", "Catalogues", so that title may be changed.

No. 1 size, 10¼x7¼x2¾ inches inside
 " 2 " 11 x8¼x2¾ " "

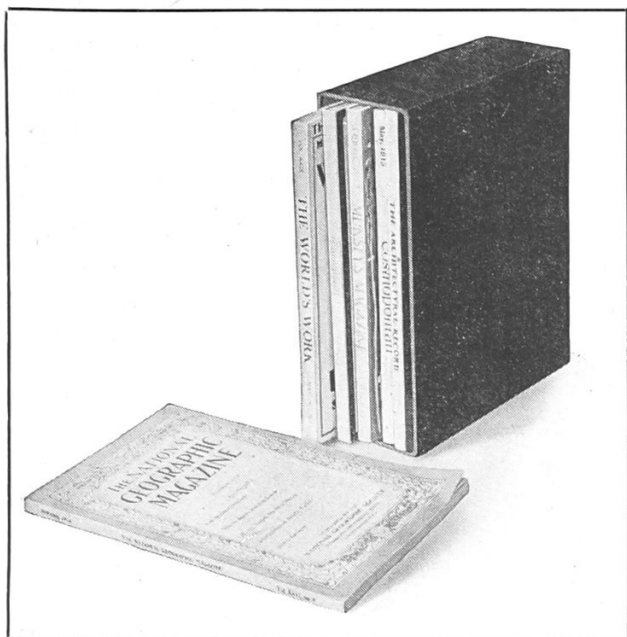

Packed one dozen to a carton.

Shipping weight, No. 1 215 pounds per gross.
 " " No. 2 240 pounds per gross.

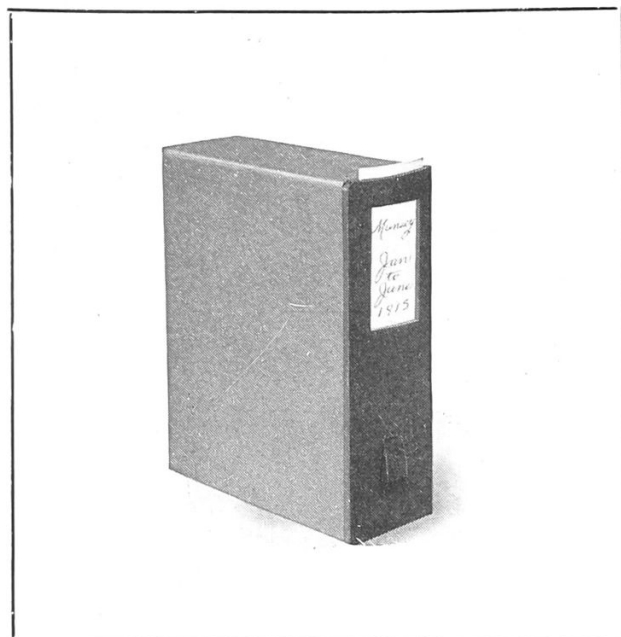

SEE PRICE LIST

No. 3 PAMPHLET CASE FOR STANDARD SIZE MAGAZINES

Largely used by Agricultural Colleges for filing Pamphlets,
U. S. Government Bulletins and Reports.

Illustrating how six standard size magazines will fit in the No. 3 Pamphlet Case.

The back of Case No. 3, illustrating the label holder for a 3x5 card, allowing ample room for indicating contents of case. The case is fitted with a tough cloth loop pull.

New Style—a low priced container for standard size magazines, pamphlets, catalogues, etc. Strongly made of heavy binder's board—covered with dark paper—black cloth front. Large panel constructed label holder accommodating a standard 3x5 record card.

Three uses of the No. 3 Pamphlet Case are to preserve:

First—Various pamphlets and magazines containing articles bearing on one subject, such as Consular Reports and Agricultural Bulletins

Second—Six consecutive issues of any standard magazine, as Harper's, Scribner's, National Geographic, etc.

Third—Six different magazines for any one month, as shown in the illustration above.

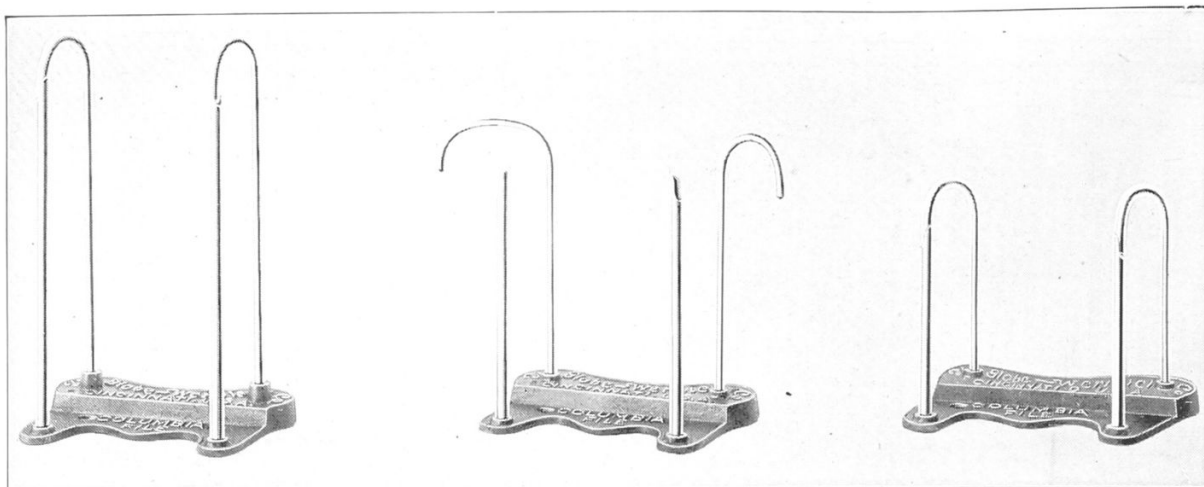

With the introduction of this Case a happy combination is suggested. Here is a low priced Pamphlet Case which exactly fits a low priced Globe-Wernicke Bookcase Section, i. e., the Book Unit which measures 10 $\frac{1}{4}$ inches high by 8 inches deep inside.

Size Outside
No. 3 Pamphlet Case, 8 inches front to back, 3 $\frac{3}{4}$ inches wide
by 10 $\frac{1}{4}$ inches high

Packed one dozen in a package
Shipping weight, 200 pounds per gross.

COLUMBIA ARCH

Measuring $2\frac{3}{4}$ Inches Center to Center of Posts.

Extra High Arch, 6 in. high

High Arch, $4\frac{5}{8}$ in. highRegular Arch, $3\frac{5}{8}$ in. high

The front filing posts of this Arch are constructed of heavy steel tubing, insuring strength.

The heavy steel Arch, when closed, forms a perfect register by engaging in top of front filing posts, leaving no projections to tear papers.

Regular Arches, only		$3\frac{5}{8}$ in.	high over all
High Arches, only		$4\frac{5}{8}$ "	" " " "
Extra High Arches		6 "	" " " "

One-half dozen in a package.

Shipping weight about 70 pounds per gross.

COLUMBIA BOARDS

These boards are made of heavy material, have a fine dull rubbed finish, not easily scratched.

Note size, 7x12 inches.

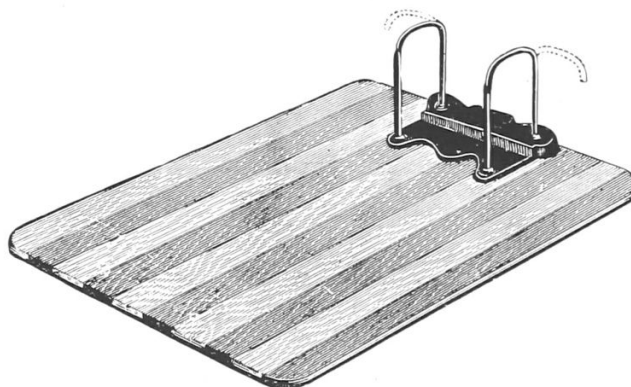

Letter size, $9 \times 14\frac{1}{2}$ inches

Cap size, 9×17 inches.

Shipping weight about 185 pounds per gross.

COLUMBIA FILE

Consists of Board and Arch

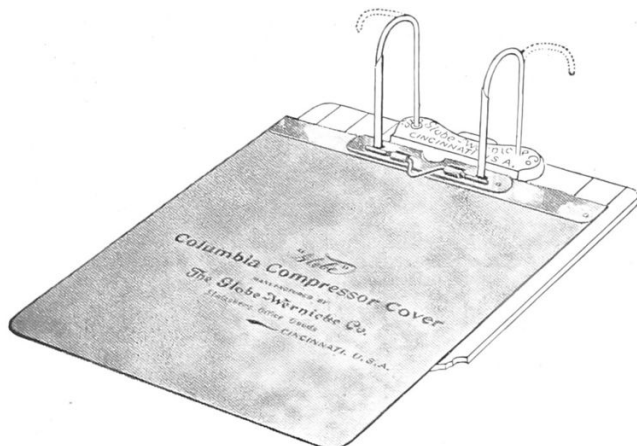

File consists of Board and Arch only. In ordering, if index, perforator and cover are wanted, please specify.

NOTE—It should be explained that small perforator, No. 1 can be attached to the File Board for perforating the papers that are to be hung on the file.

SEE PRICE LIST

COLUMBIA BINDING CASE, with Arch, $2\frac{3}{4}$ inches Center to Center.

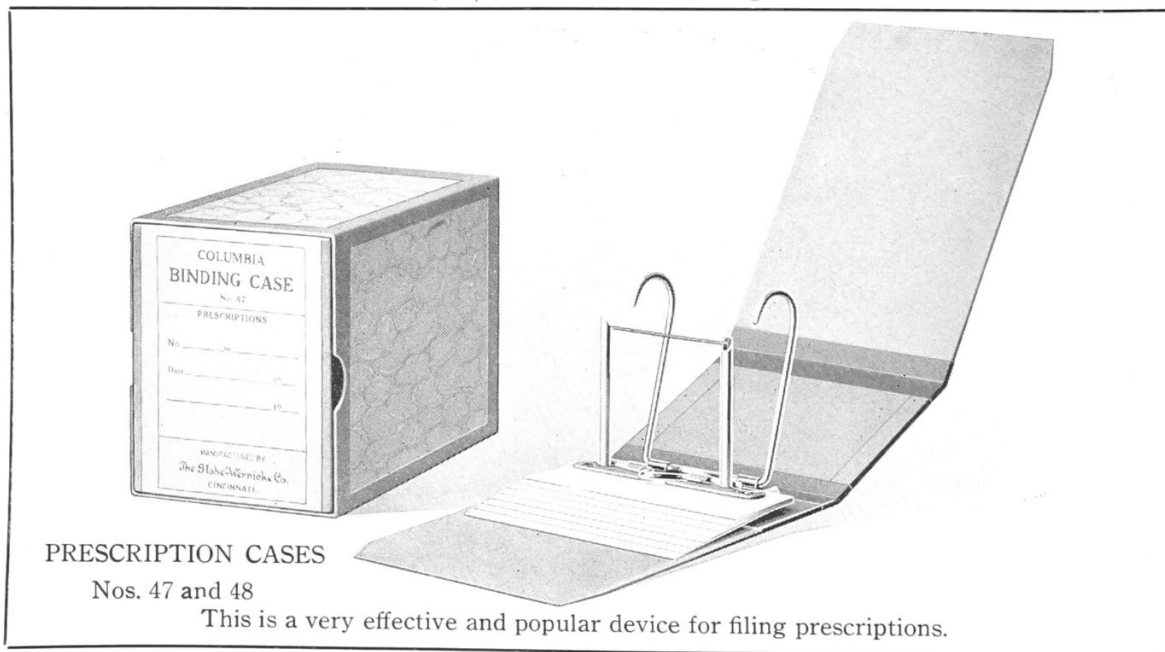

Made in telescope-box style of tough fibre board, with arch on inner case as shown. Fitted with patent interlocking metal corners, permitting entire case to be shipped knocked down in flat shape, and packed in small space. The double arch file fitted in this case permits papers to be examined, removed or replaced with the same facility as when on the board or in the cabinet file. A steel compressor fits over the posts of the arch—this holds all papers compactly together. Nos. 47 and 48 are shipped set up, and are not fitted with interlocking metals.

The patent metal corner pieces used in this construction are ingeniously made and attached, so that a slight pressure securely and instantly locks them.

GLOBE UNION PERFORATOR, No. 1

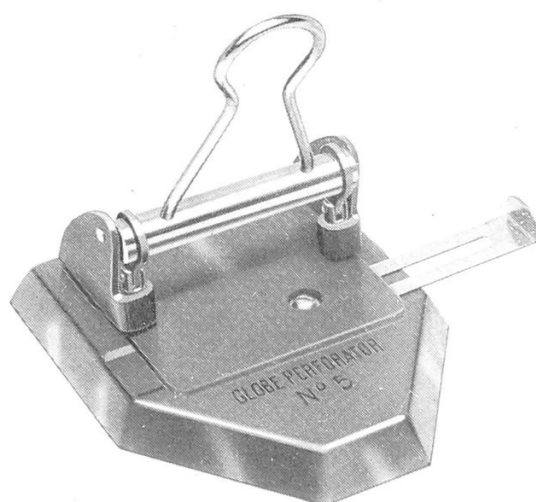

Our old reliable nickel-plated Perforator, with wire handle, made by special machinery, and, while similar in appearance, is much stronger in construction than any other of its kind. Will work with any double arch file.

Perforates holes $2\frac{3}{4}$ inches between centers.

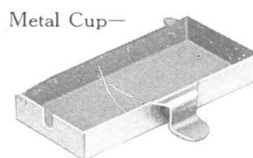

Packed one-half dozen in a box.

Shipping weight, 60 pounds per gross.

GLOBE PERFORATORS Nos. 5 and 3

No. 5
Wrought steel base
Oxydized finish; working parts
are all nickel-plated.

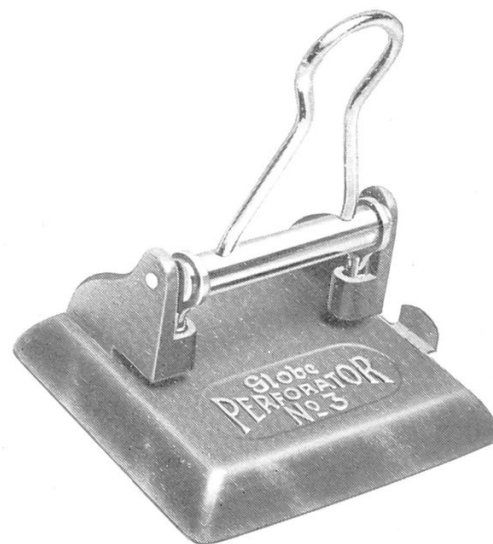

The cutting principle is the same in both perforators, the punches being made of the best tool steel.

Each is fitted with metal cup in base to receive cuttings, also an adjustable sliding gauge governed by a set screw.

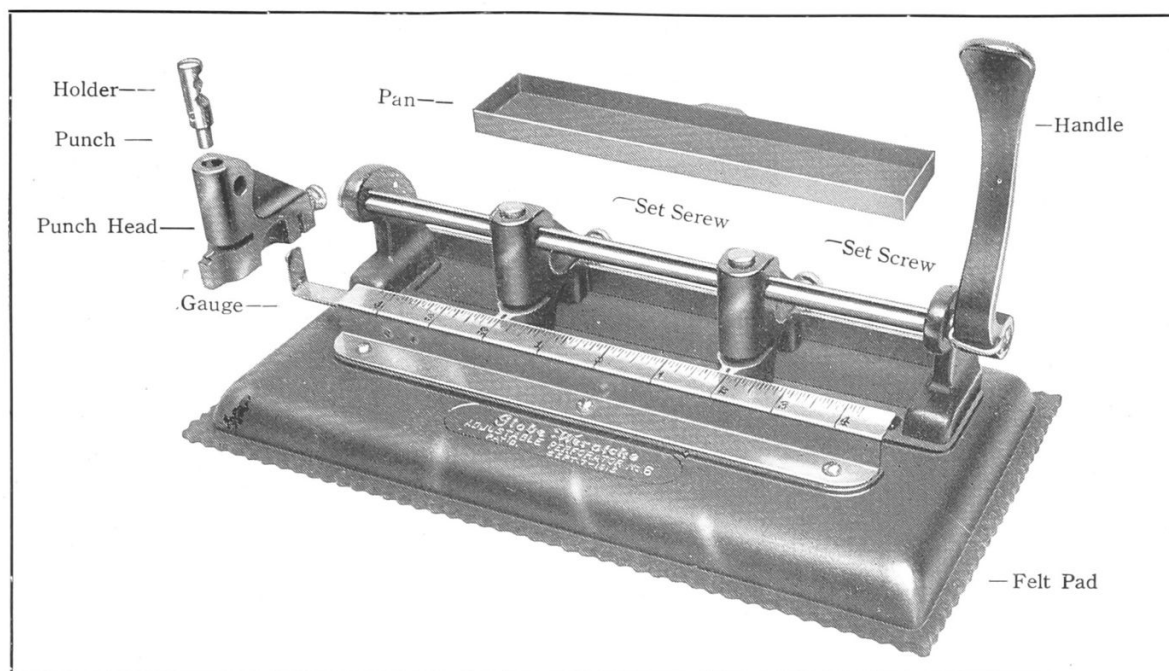

Perforates holes $\frac{1}{4}$ inch in diameter, and $2\frac{3}{4}$ inches between centers.

Packed one in a box.

Shipping weight, 3 pounds each.

No. 3
Heavy cast base.
Oxydized finish; working parts
are all nickel-plated.

No. 6 ADJUSTABLE PERFORATOR

Patented Sept. 7th, 1915

A new and improved machine.

BASE. The base is made of one piece of gray iron, with a rib running full length on the under side, making it rigid and strong.

BEARINGS. Two bearings, one at either end of the operating shaft, are securely screwed to top of the base. These bearings are made of the best gray iron and accurately machined, thus holding the operating shaft in perfect alignment.

SHAFT. This is made of the best machinery steel, rolled especially for the purpose, and is strong and durable.

PUNCH HEADS. The punch heads are made of the best gray iron obtainable, machined accurately, all holes being drilled in one jig to insure perfect alignment and interchangeability. The punch which pierces the paper and the shaft which operates the piercing punch are self contained in the head, eliminating springing that would otherwise occur. This head slides on the operating shaft and a bar behind, permitting it to be adjusted in any position to the bar by a set screw in the back of the head.

These heads may be removed or replaced. As many heads as necessary can be used at one time and worn heads replaced with new ones.

PUNCH & HOLDER. The punch is made of the best quality stub steel, the piercing end being ground concave to give shear action when cutting through the paper. The punch is held in a holder which drives it, but which permits it to float or adjust itself, thus insuring perfect alignment at all times. Perforates round holes $\frac{1}{4}$ inch in diameter.

GAUGES. The graduated gauge is highly nickled. The graduations begin at the center of the gauge and read both right and left to facilitate the setting of the heads. The readings are $\frac{1}{4}$ inches each way, allowing a maximum distance between the outside holes of $8\frac{1}{2}$ inches.

The adjustable gauge is mounted at the left of the perforator and is very easily set in any desired position, it being held there by a friction clamp.

HANDLE. The operating handle is made of the best quality of malleable iron. It is mounted at the right of the perforator and is returned and held in normal position by a spring.

PAN. The pan for catching the punchings is made of sheet steel being of ample size to hold a quantity of waste thus avoiding frequent emptying. It is so constructed that it can be instantly removed.

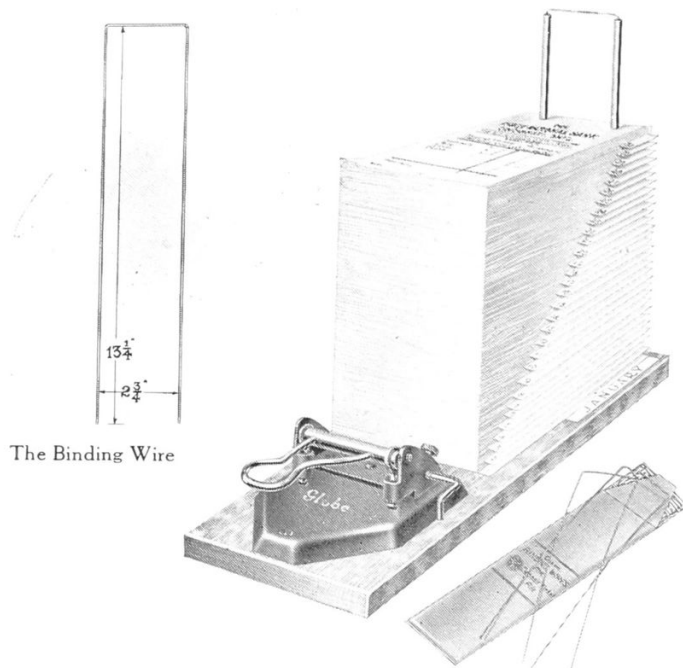

CAPACITY. Greatest distance between outside holes— $8\frac{1}{2}$ inches
 “ number of heads that can be used—13
 “ width of sheets that can be gauged—24 inches
 “ number of sheets (16 lb. bond) that can be pierced—30

Stock Perforator equipped with two heads. Supplied with extra head if desired.

Packed one in a box. Felt pad supplied for each machine to rest on. Shipping weight 10 lbs. each.

NEW GLOBE DEPOSIT TICKET FILES

These files are substantially made. Heavy Oak Board upon which is mounted a No. 5 Globe Perforator. Two holes are bored in under side of board, permitting cuttings from Perforator to escape. Two heavy seamless steel tubes, 9 inches high, engage in threaded metal bushings countersunk in board, thus creating the desired rigidity.

No. 105 DEPOSIT TICKET FILE

$2\frac{3}{4}$ inches center to center of posts.

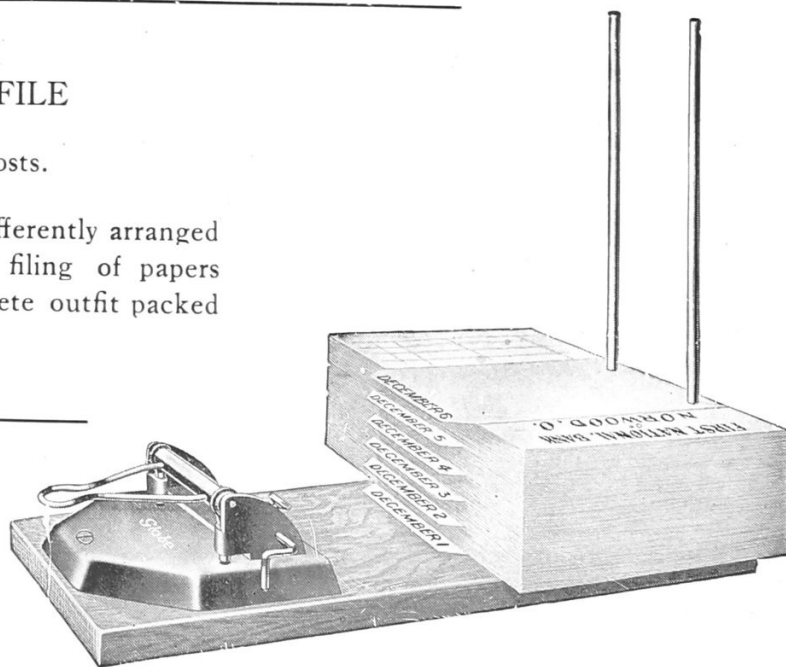

Consists of a Board, Perforator, 2 Filing Posts. Also 12 Wires used for binding the accumulated tickets, sufficient to last one year, 12 Daily Indexes and 1 Monthly Index. For papers $4\frac{1}{4} \times 7$ inches. Outfit complete as described is packed in a neat carton ready for shipping.

Weight 7 pounds.

No. 205 DEPOSIT TICKET FILE

$2\frac{3}{4}$ inches center to center of posts.

Equipped the same as No. 105, except differently arranged indexes—see cut—thereby permitting the filing of papers which are longer than seven inches. Complete outfit packed in carton.

EXTRA SUPPLIES

Extra supplies for either No. 105 or No. 205 Files for one year, consisting of twelve Daily Indexes, one Monthly Index and 12 wires. Packed complete in box.

When ordering, specify whether extra supplies for No. 105 or No. 205 are desired.

SEE PRICE LIST

SUGGESTIONS FOR TRANSFERRING THE ACCUMULATED TICKETS

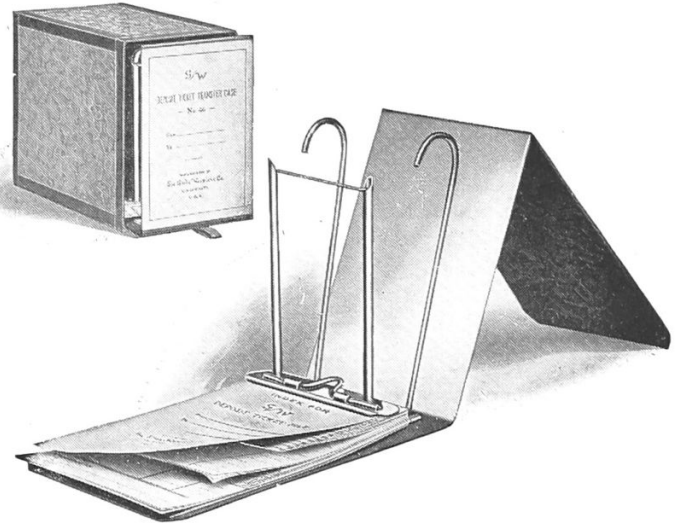

No. 46 DEPOSIT TICKET TRANSFER CASE

For papers $4\frac{1}{4} \times 7$ inches.

$2\frac{3}{4}$ inches center to center of posts

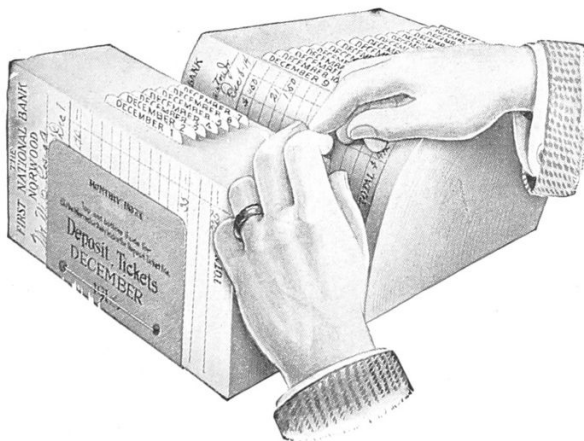

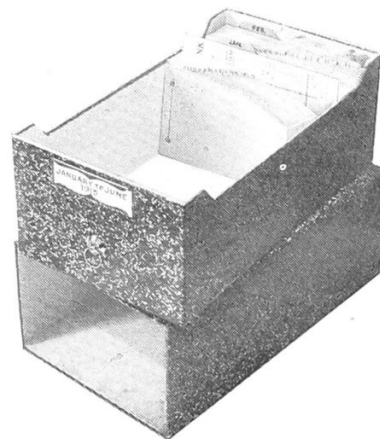

This Transfer Case is substantially made of Jute Board; cloth re-inforced. "Knock Down" construction. Equipped with Arch, 6 inches high and with Metal Compressor.

Wrapped 6 to a package.

This cut illustrates another method of transferring contents of a No. 105 Deposit Ticket File to No. 58 C. I. Storage Case—see page explaining Card Index Storage Cases in this catalogue.

The law compels the holding of deposit tickets for 6 years, and the above affords an inexpensive scheme for storing the same.

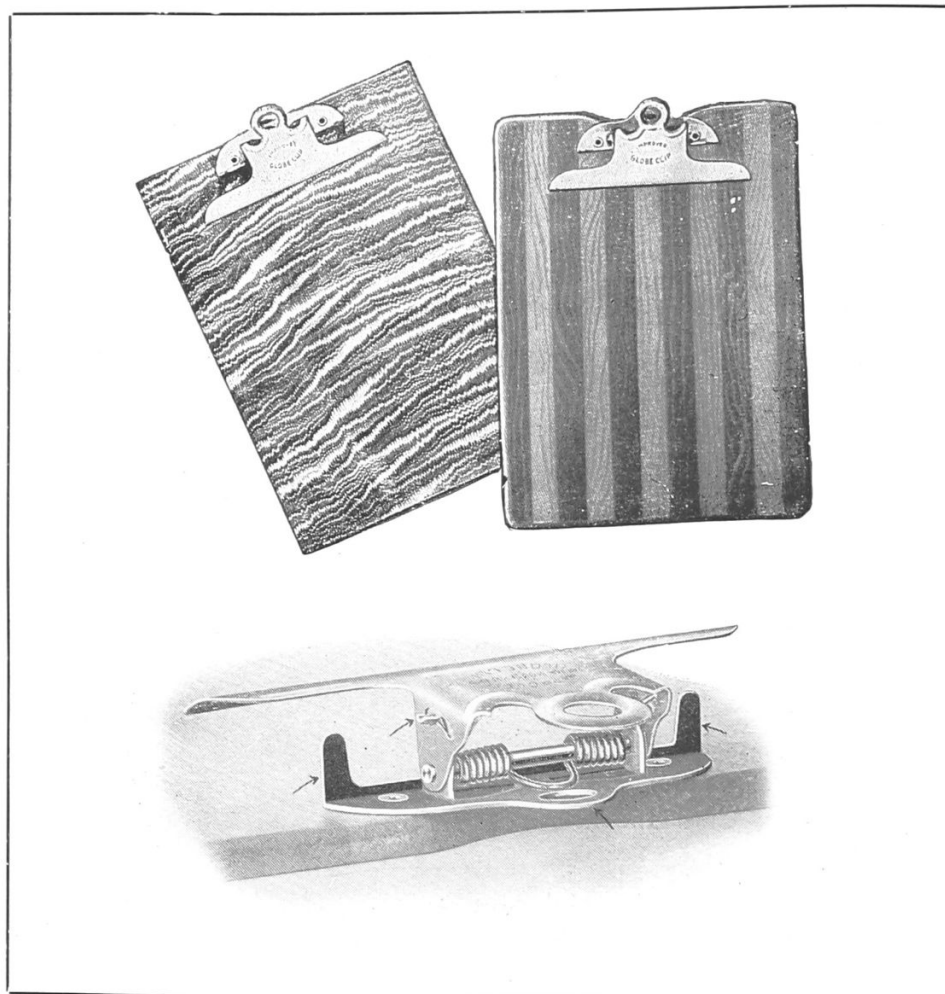

This illustration shows one month's accumulation of deposit tickets, sales slips, or other papers taken from a No. 205 File and bound with wire. Opens like a book for reference.

SEE PRICE LIST

IMPROVED GLOBE BOARD CLIP

Patented Sept. 19, 1905

An improvement over the old style of Clip which has proven immensely popular.

Notice the upper arrow pointing to the automatic stop which holds the Clip up so that both hands can be used to finger papers.

Notice the two center arrows indicating the shoulders against which papers square.

The lower arrow indicates the hole for hanging the file up on a nail.

Mounted on Striped Boards dull rubbed finish; Tar Boards cloth covered back, marbled finish top.

	Note	Letter	Cap

No. "N 12 P. H."

Finished in Antique and having paneled ends, this case contains twelve openings in which either No. 1 or No. 3 style file boxes can be placed. File boxes measure 10x4 $\frac{1}{2}$ x4 $\frac{1}{2}$ inches outside.

The openings being of equal height and width, the case can be used in either a horizontal or upright position.

No. "N 12 P. H." Shipping Weight 36 lbs.

The units have no intermembering features but will set very nicely one above the other as shown.

Here the lower unit is equipped with No. 1 drop front file boxes shown at top of next page.

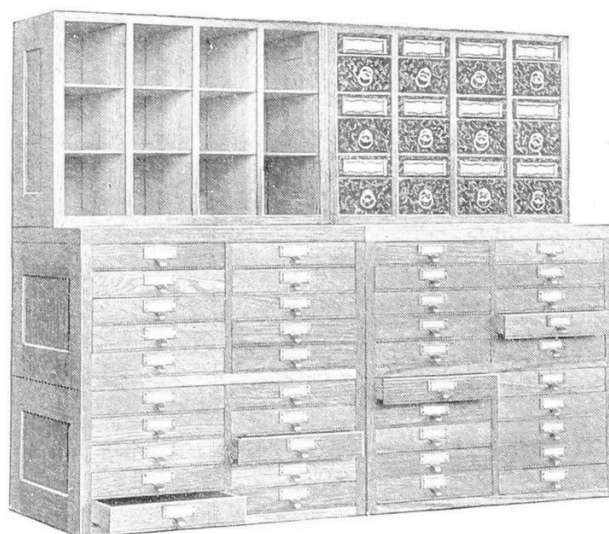

—N 12 P. H.

—N 22 Top

—N 10 L. B.

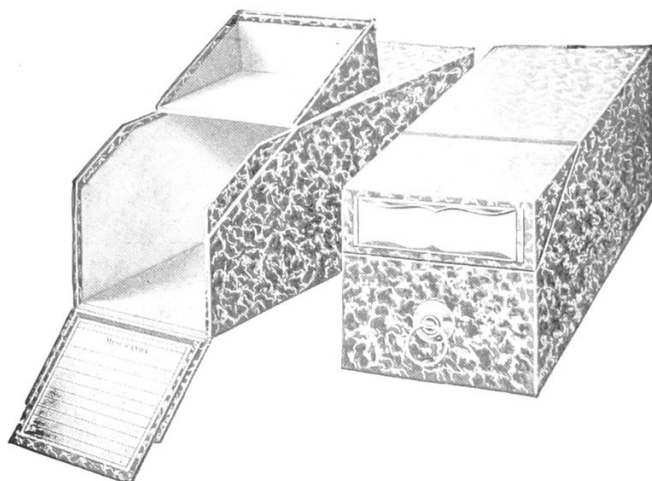

The No. "N 12 P. H." section is the same in width as the No. "N 10 L. B." but not the same in depth. The P. H. can be used above the L. B. in one combination by placing a No. 22 top between as illustrated.

A larger combination of
"N 12 P. H." and "N 10 L. B." Cases.

The "N 4, Leg Base" can be used under the Legal Blank Section but not immediately beneath the Pigeon Hole Section.

THE No. 1 FILE BOX

Made of tar-board, covered with marbled paper, and lined throughout. Double sides and back, with reinforced joints making it stronger than any other. Fitted with metal label holder and ring pull. Dustproof. The best and most popular file box manufactured.

Outside dimensions, 10 inches long, 4½ inches wide, 4½ inches high.

Packed one dozen to a carton.

Shipping weight, about 145 pounds per gross

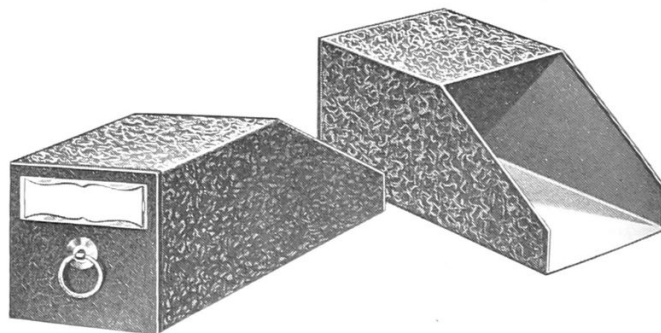

THE No. 3 FILE BOX

Patented.

Made of pressboard with black cloth front, and bound on front edges with brass strips. Open at back. Fitted with metal label holder and ring pull.

The best box of the kind manufactured.

Outside dimensions, 10 inches long, 4½ inches wide, 4½ inches high.

Wrapped in one-half dozens.

Shipping weight, 145 pounds per gross.

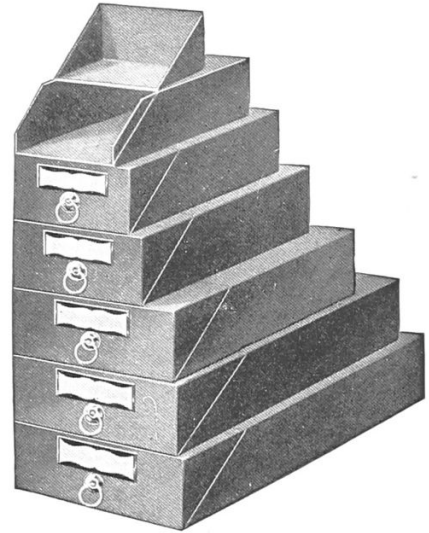

STATIONER'S SHELF BOXES

CORRESPONDENCE DISTRIBUTORS

Quartered Oak or Imitation Mahogany.

No. 25

CORRESPONDENCE DISTRIBUTOR

For Letter Size Papers
Shipping Weight, 30 lbs.

No. 1225

STAND FOR CORRESPONDENCE DISTRIBUTOR

Either the No. 25 or the No. 12 Distributor can be used on this stand. The convenience of the stand for rolling the distributor before a battery of Filing Cabinets is self-evident. It can be rolled up to the side of a desk for distributing papers. Can be used in many ways.

Quartered Oak or Imitation Mahogany.

Dimensions

24 $\frac{1}{8}$ inches high, 12 $\frac{1}{8}$ inches wide, 12 $\frac{1}{8}$ inches deep.
Shipping Weight 45 lbs.

The Distributor contains 25 Extra Heavy Pressboard Guides, one letter of the alphabet on each tab, except the second last which has two i. e., "X-Y". The tabs are covered with celluloid making them more durable and preventing soiling.

There is a rod in bottom of distributor which runs through a reinforced eyelet in tongue at bottom of each guide. A follower block to hold guides at whatever position desired also operates on this rod.

Body of distributor is quartered oak finished Antique varnished and rubbed. Can also be had in Imitation Mahogany.

Bottom is fitted with felt discs to prevent scratching.

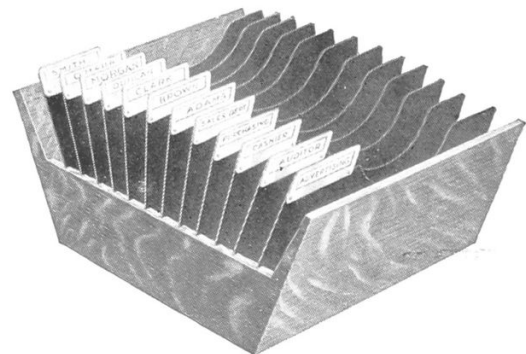

One excellent use suggested. Sort papers before filing and save time.

Without this device a file clerk wastes hour after hour walking up and down before a battery of filing cabinets, first filing a letter from "Acme Veneer Co." under "A" and then walking 10 to 50 feet to file "Zero Refrigerating Co." under "Z".

With the "No. 25" in use the file clerk first distributes all papers between guides in Distributor and then the "A's" are filed first, "B's" second "C's" next and so on, and there is no walking to and fro.

Outside Dimensions

12 $\frac{3}{4}$ inches wide, 11 inches high, 18 $\frac{1}{2}$ inches deep.

No. 12

CORRESPONDENCE DISTRIBUTOR

For Letter Size Papers

Instead of covering the desk with many trays and baskets, use this SINGLE device (occupying very little desk space) to distribute mail or other papers to all departments.

It contains 12 steel partitions enameled olive green each fitted with large nickel tab for blank labels.

The partitions are removable and can be arranged for any number of compartments not exceeding twelve.

A small semi-circle or arc is cut out of the top of each partition to allow ample hand room in lifting papers out of compartments.

Body of distributor is quartered oak, finished Antique, varnished and rubbed. Can also be had in Imitation Mahogany.

Bottom is fitted with felt discs to prevent scratching.

Outside Dimensions

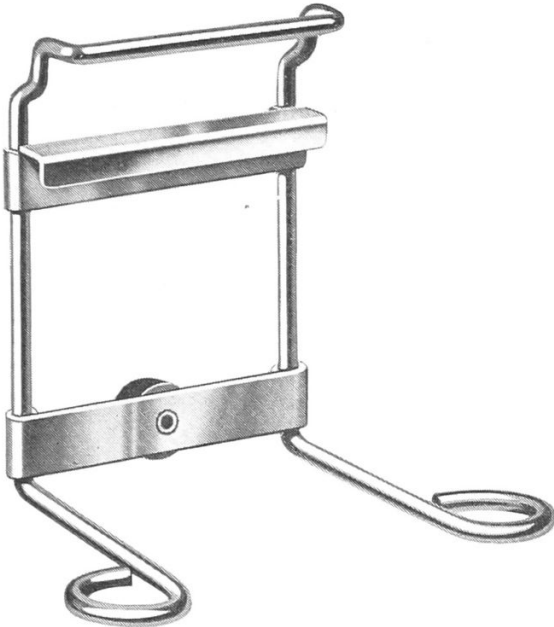

12 $\frac{3}{4}$ inches wide, 9 $\frac{1}{2}$ inches high, 18 $\frac{1}{2}$ inches deep.

Shipping Weight 40 lbs.

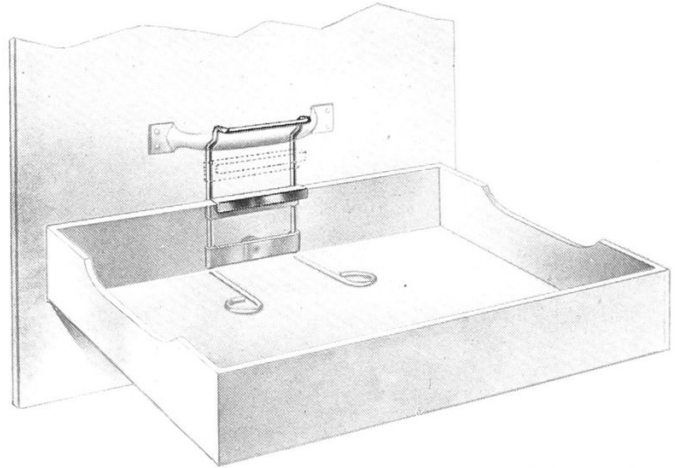

FILE HANGER FOR DESK TRAY

A Hanger to support a Desk Tray from Vertical Drawer Handle or Pull to enable a File Clerk to use both hands for Quickly Filing Papers.

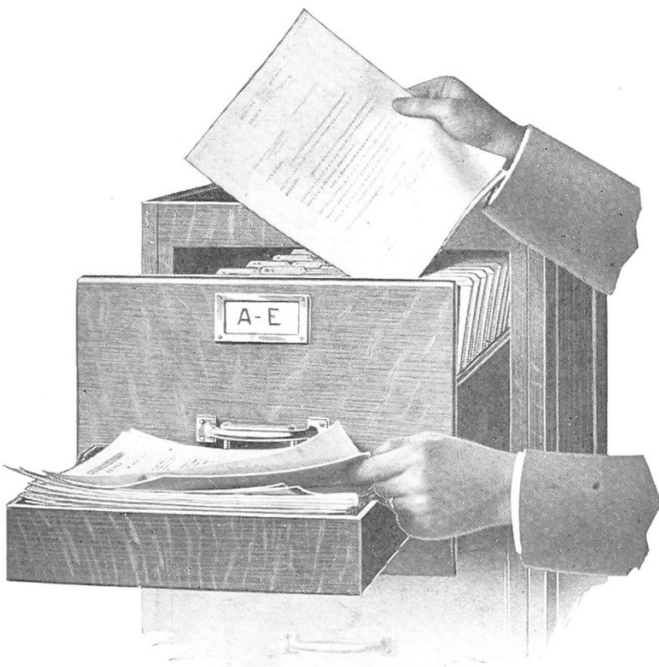

In a fraction of a second the desk tray is placed in hanger and hooked on file drawer.

No. 7 FILE HANGER FOR DESK TRAY

Phantom view showing how the No. 7 File Hanger fits and supports the Globe Desk Tray and suspends it from the file drawer making an ideal filing tray.

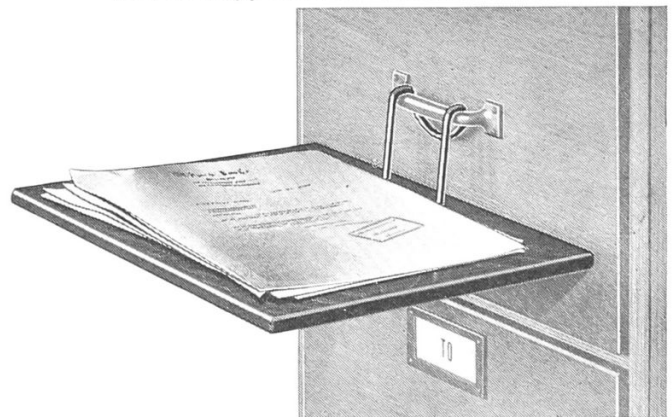

No. 7 FILE HANGER in actual use

An inexpensive little device that makes for efficiency by saving time and many steps. Strong and durable, it will last forever and the lost motion eliminated will pay for it many times over.

FILING SHELF

Saves 50% of File Clerk's Time

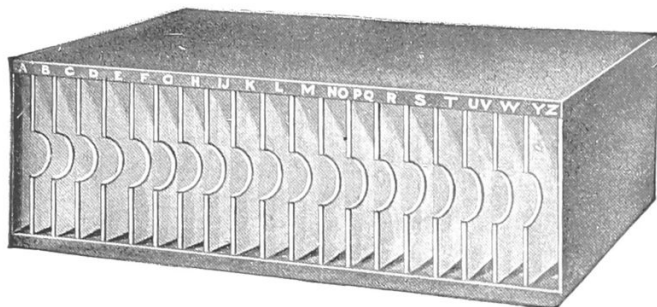

No. 6 Filing Shelf

A batch of papers to be filed is placed on the shelf and both hands can be used to file them. Eliminates holding papers in one hand and filing with the other, also walking distances to get more papers.

A beautifully finished quartered oak shelf 13 inches wide by 11 inches deep with a solidly bolted on nickel-plated hanger and with rubber bumpers to prevent scratching finish on file. Can be hung from any Globe-Wernicke vertical file drawer. Also furnished in Imitation Mahogany.

No. 87 STATEMENT DISTRIBUTOR

Made of wood and tarboard, covered with leatherette. Has twenty Divisions, each 1 inch wide, $8\frac{1}{4}$ inches deep, 7 inches high, marked alphabetically, as shown in cut. Especially designed for temporary distribution of statements or bills. Also most convenient for small catalogues, price lists, etc.

A great convenience to the bookkeeper and the bill clerk.

Size outside, $22\frac{5}{8}$ inches wide, $8\frac{1}{2}$ inches deep, 8 inches high.

Packed three to a carton.

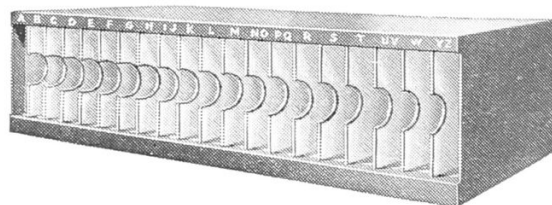

Shipping weight, about 45 pounds.

No. 74 ENVELOPE DISTRIBUTOR

A great postage saver. Stops leaks in the postage account and saves stenographer's time, in that only one envelope is addressed to one firm during the day instead of two or more to the same firm.

A saving of two cents per day for 312 working days means \$6.25 per year. Now multiply.

The Distributor is made of wood and tarboard, covered with leatherette. Has twenty Divisions, each $\frac{3}{4}$ of an inch wide, 7 inches deep, $4\frac{1}{8}$ inches high. Marked alphabetically.

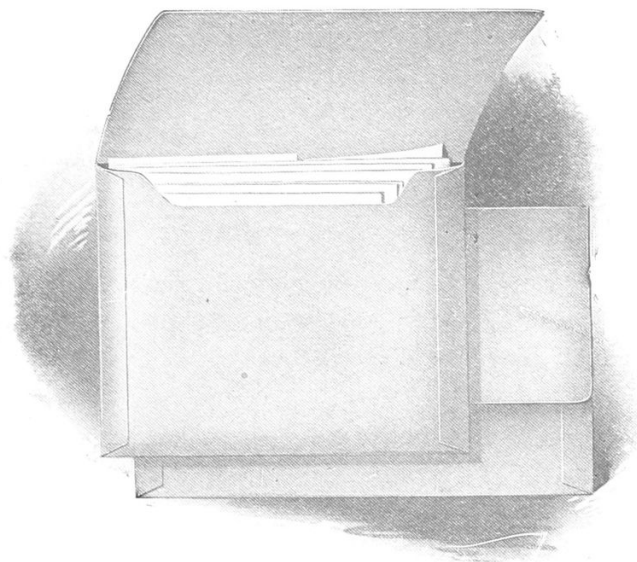

Size outside, $17\frac{5}{8}$ inches wide, 7 inches deep, $5\frac{1}{2}$ inches high.

Packed three to a carton.

Shipping weight, about 37 pounds.

METAL SUPPORTS FOR SECTIONAL DESK TRAYS

Finished Dull Brush Brass

Patented Jan. 24, 1911

Stacks of No. 4 Trays.

The Sectional Desk Trays are arranged to be fitted with four detachable supports which automatically clamp on the sides of the tray underneath. The tops of these supports engage in holes in the bottom of the tray above. These trays can be stacked as high as desired, using either Nos. 1, 2 or 4 style, which we carry in stock with holes already bored.

For description of the Nos. 1, 2 and 4 Desk Trays, see page 44. The above described metal parts are packed three sets (4 to a set) to a box.

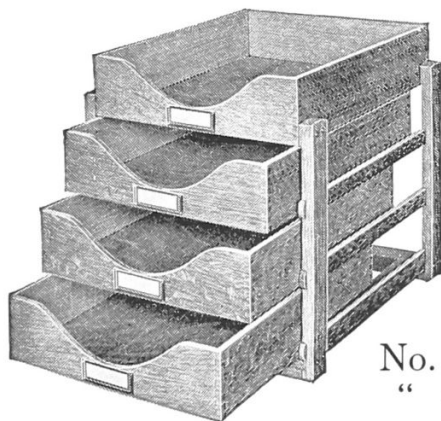

DESK TRAY RACK

Letter & Cap Sizes

For Distributing Mail and All Correspondence.

Letter Size No. 42

Cap " No. 44

Consisting of one Desk Tray Rack, and four Desk Trays.

The skeleton frame is sturdily built—the top tray being secured in the frame, thus adding to the rigidity of the frame. The Desk Trays slide out on steel runners and each tray is fitted with a metal label holder.

Sizes Outside Overall

No. 42 Letter,	12½ in. deep	by 11½ in. wide	by 12½ in. high.
" 44 Cap	15⅜ " "	" 11½ " "	" 12½ " "

One outfit as described, packed complete, in a wooden case ready for use.

Shipping weight about 20 pounds.

Supplied in Quartered Oak Antique Finish or in Imitation Mahogany.

SEE PRICE LIST

DESK PORTFOLIOS

A useful, convenient and attractive receptacle, containing four compartments for the temporary care of letters and papers, with ample space for memoranda, bills, correspondence, etc., of which a daily or occasional reminder is desired. Can be used as a temporary file of ample expansion, and protects papers and letters from curious eyes and keeps desk clean.

Dimensions 10x12½ inches.

Style and Description

No. 1 Embossed Leatherette	}	With leaves made of heavy tag board having Manila pockets. Leatherette tabs labeled: "Immediate" "In Suspense" "Future Consideration" and "Bills and Statements."
----------------------------	---	---

Packed one-half dozen in a box.

SEE PRICE LIST

EVERY DAY AND LEGAL BLANK FILES

These popular desk files are substantial and attractive. Papers may be filed by names or the lettered tabs may serve as an index to the use of the various compartments, such uses being noted on the index sheet inside of front cover.

No. 200 PLATE GLASS DESK PAD
Rounded Corners

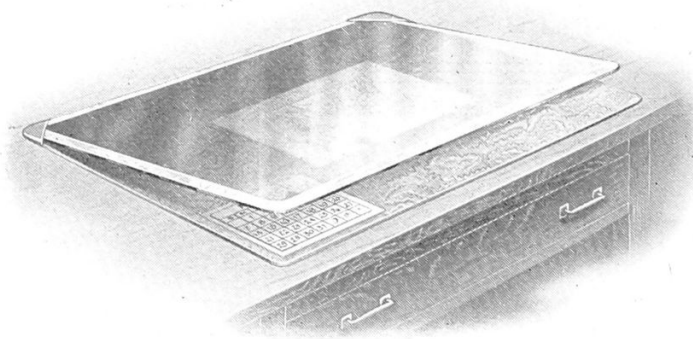

A Desk Pad with a Highly Polished Beveled Edge Plate Glass Top. It protects the desk and assures cleanliness, neatness and convenience.

The body of pad is flexible; the bottom is soft and velvety. The upper surface of the pad exposed through the glass is a daintily finished moire cloth of a brown shade to harmonize with the ooze retaining corners on the far side of the pad. As shown in illustration below, the plate glass top may be raised and a calendar, map or memorandum placed under it.

Size of pad - - - 18 x 24 inches

Each pad packed in heavy carton and then wrapped.

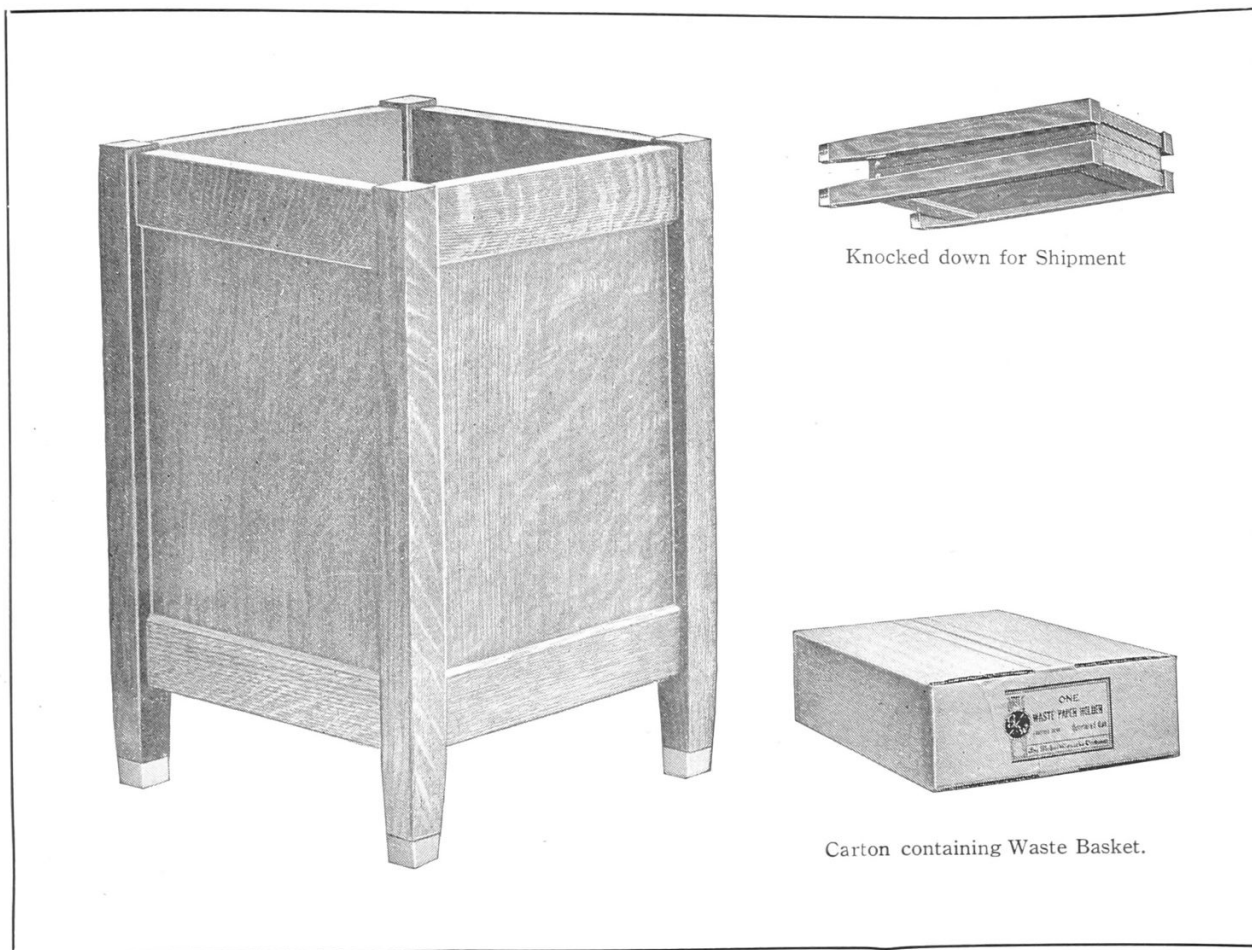

Shipped in Heavy Wooden Box, weight 30 pounds.

Shipping weight for six in heavy wooden box, 105 pounds.

SEE PRICE LIST

Packed one in a carton.

Shipping weight 10 pounds.

SEE PRICE LIST

G-W DESK FILE CAN BE USED ON A DESK—IN ANY DRAWER OF DESK OR
IN A DESK TRAY

THE G-W DESK FILE

The G-W DESK FILE measures 9½ inches wide by 14 inches long, thus it is wider (insuring complete protection of papers filed), and in length it consumes much less desk room than similar devices now on the market.

The expanding back, an exclusive feature, is strongly reinforced, and while permitting maximum filing capacity of one inch for each compartment the metal tabs will never be out of alignment whether pockets are filled to capacity or empty.

Cover and leaves flexible.

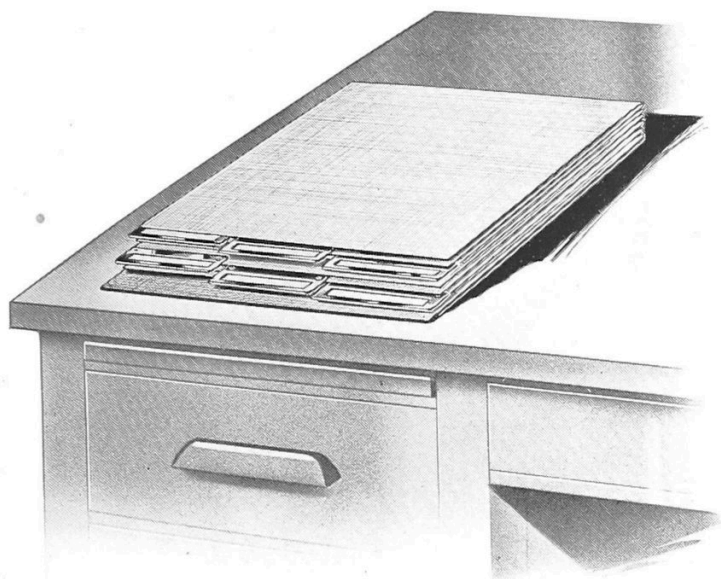

The metal tabs afford an unusually large writing space—the blank or labeled card being protected by a celluloid window.

Made in two grades, each in six and twelve pocket capacity as follows:

Pattern No.	Number of Compartments	Material
112	12	} Genuine Leather Top Cover with } "Nearleather" index.
106	6	
212	12	} Green Leatherette Cover with "Near- } leather" index.
206	6	

G-W DESK FILE
ORDER IS THE FIRST LAW OF THE UNIVERSE
KEEP YOUR DESK CLEARED FOR ACTION

The G-W Desk File will promote method and efficiency in planning the daily routine of your desk work as it affords a definite and convenient temporary housing for all important papers and memoranda found on every executive's desk.

The Six Pocket File

With indexed expanding compartments it provides a place for each group or class of important papers.

There are two sizes of files, one with six pockets, the other with twelve. Each compartment has a nickel tab or label holder. The metal tabs may be labeled to serve the needs of any individual. The following list represents a standard daily practice for a six pocket G-W. Desk File:

1	2	3
Immediate	Matters Pending	To Dictate
4	5	6
To Sign	Clippings	Personal

SUGGESTION FOR A TWELVE
POCKET FILE

1	2	3
Immediate	Matters Pending	To Dictate
4	5	6
To Sign	Invoices	Bills of Lading

(Balance may be indexed Alphabetically)

A-E	F-K	L-P
Q-R	S-T	U-Z

Compartments may be assigned to—"Salesmen's Reports," "Branch House Reports," or "Current Data" of any kind which must be referred to frequently.

The G-W Desk File is not limited for use on top of a desk but it is advantageously used in a desk drawer (see illustration opposite) thus you keep your desk constantly cleared for action, and papers are kept away from prying eyes.

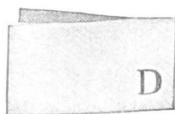

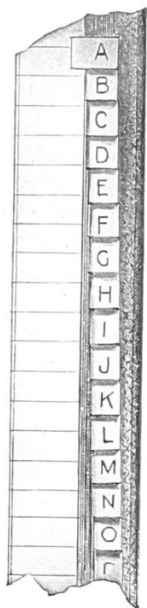

Another excellent use is in a G-W No. 4 Cap Size Desk Tray (see illustration opposite). The usual practice is to throw papers "any old way" into a desk tray. Here you have an efficient desk file made to fit in a Cap Size Desk Tray, offering a suitable receptacle for holding the File, hence your papers are filed in the order as needed—not so with an ordinary desk tray.

Patented May 8, 1906.

A valuable addition to any desk, giving extra desk room when wanted, and out of the way when not wanted. Suitable for use as writing table for holding typewriter, adding machine, card cabinet, telephone or books of reference.

This shelf has been greatly improved by a positive locking device in the shape of an eccentric lever which secures shelf in any position desired. Can be attached to any desk and can be used on either side.

Metal parts attractively finished in dull nickel.

Dimensions of shelf 14 x 19 inches.

Banker's Note Case No. 4

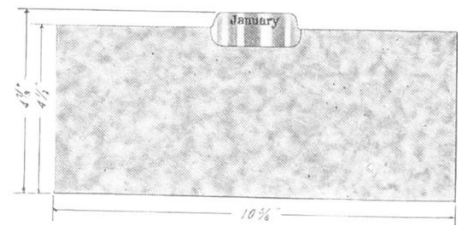

Made entirely of steel with good substantial handle and lock. Strong in every detail—material, construction, workmanship and finish absolutely the best—the finish, either Olive Green or rich dark Mahogany, is especially beautiful. There are double walls at front, back and both sides. The hinges for the flanged lid operate between the double side walls. The Case is equipped with rubber feet so it can be placed on the finest desk without danger of marring the finish.

HEAVY PRESSBOARD GUIDES as follows ARE FURNISHED IN
EACH CASE as shown in above picture

- 1 Set of Monthly Guides—tabs cut fifths and covered with orange celluloid—center position.
- 1 Set of Daily Guides—tabs cut eights and covered with yellow celluloid—distributed.
- 1 Set of Alphabetic Guides (25) A-Z—tabs cut fifths and covered with green celluloid—distributed.
- 1 Guide printed “DEMAND” tab cut thirds and covered with Blue Celluloid—right position.
- 1 Guide printed “PAST DUE”—tab cut thirds and covered with Red Celluloid—left position.
- 2 Guides with Large Metal tabs having removable white labels for Special Names.

ALL WOOD VERTICAL TRANSFER OR STORAGE CASES

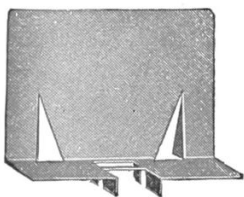

Front and all sides have framed-in panels, each Case equipped with interlocking devices, also No. 12 Label Holder and heavy steel handle, secured by countersunk bolts.

The drawers are mounted on polished steel slides which permit them to glide smoothly.

Four All Wood Transfer Cases stacked one above the other and securely locked to prevent tilting.

The 191 Steel Follower and Rod will fit all Storage Cases in any of three sizes. Wood Follower and Rod supplied when so ordered. See Price List.

In Three Standard Sizes

LETTER SIZE

No. 891 V. L. 12 $\frac{3}{4}$ inches high by 14 $\frac{5}{8}$ inches wide outside.

No. 891 Base 4 $\frac{3}{4}$ inches high.

CAP or LEGAL SIZE

No. 892 Base 4 $\frac{3}{4}$ inches high.

BILL SIZE

No. 890 V. B. 10 $\frac{1}{2}$ inches high by 12 inches wide outside-

No. 890 Base 4 $\frac{3}{4}$ inches high.

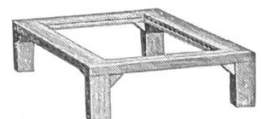

The All-Wood Transfer Case is

a substantial, durable, strong, dustproof receptacle---it enjoys the greatest sale of wood transfer cases on the market. Here is a combination of greatest storage capacity at smallest cost.

Because of its interlocking device one case can be placed above the other to the ceiling.

Where storage space is valuable they fill an economical requirement because of their narrow width.

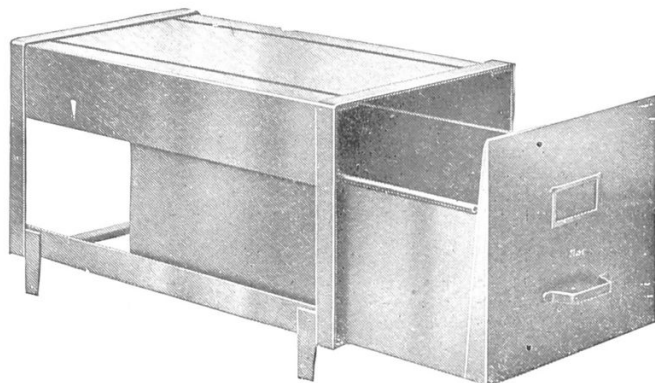

Top, sides, front and back are finished to present an excellent appearance for a transfer case.

Leg Base for
"All Wood" Storage Case

STEEL VERTICAL TRANSFER OR STORAGE CASES

Equipped with Roller Bearings

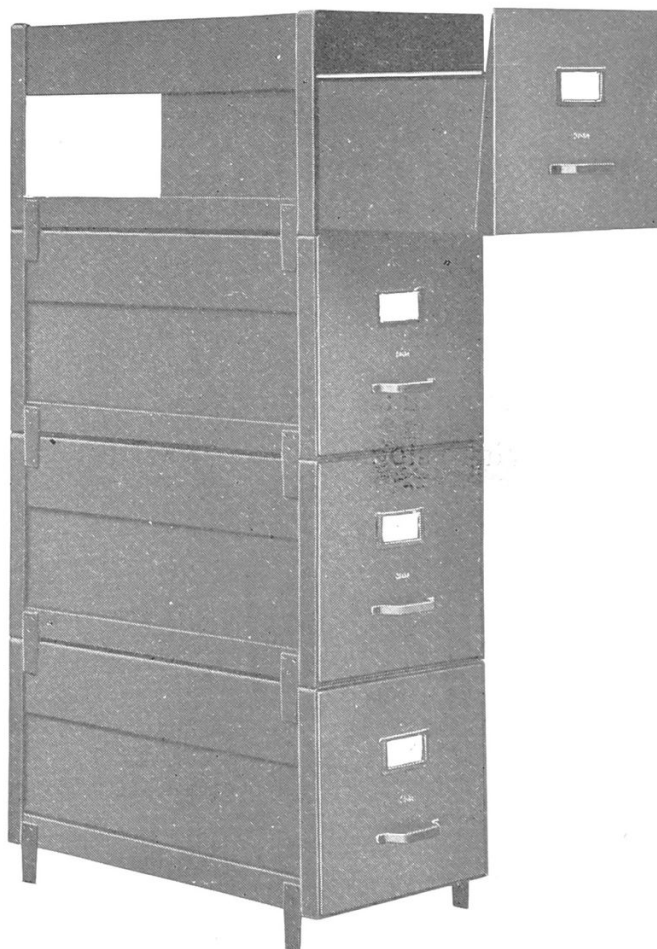

STRONG, FIRE-RESISTING, DURABLE, COMPACT,
NON-BINDING, PERMANENT

Depth of Drawer front to back permits contents of deepest
Vertical Files being placed in this STEEL STORAGE CASE
Each Case Complete in Itself

Drawer operates easily and smoothly on Roller Bearings.

For greater convenience in fingering papers, the drawer sides
have been reduced to two-thirds height, as indicated in illustration.

Each case is fitted with bars which project at the bottom, and
for the bottom case they act as a leg base, but when the cases are
stacked one on top of the other these legs straddle the cases beneath
giving a snug fit and preventing shifting. There is also an inter-
locking member on the bottom of each case which locks it to the
case beneath and thus prevents any danger of upsetting when a
heavy drawer is pulled out its full length.

Four Steel Transfer Cases stacked one above the other and
locked together to prevent tilting.

In Four Standard Sizes 25 Inches Deep

The legs project two inches beyond bottom of file.

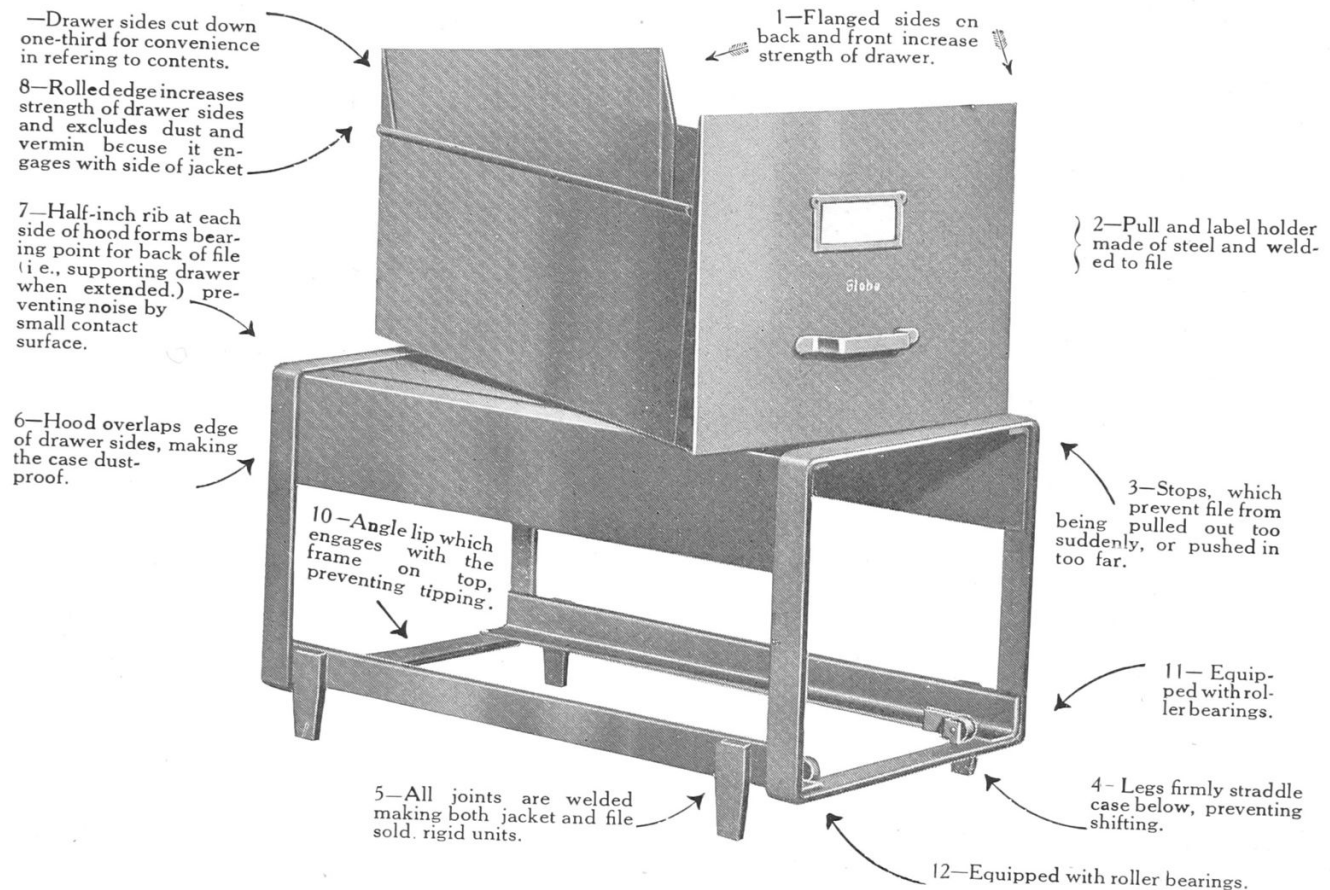

Globe-Wernicke Steel Transfer Cases protect
your records against vermin, dust, fire and water and
no matter how heavy the load they will not sag or
warp.

The importance of properly caring for inactive
papers cannot be too strongly emphasized. A paper
which may seem worthless today may settle a claim
or lawsuit in your favor tomorrow.

No. 191 Steel Follower
will fit all Storage Cases.

TWELVE POINTS OF SUPERIORITY OF GLOBE STEEL TRANSFER CASES

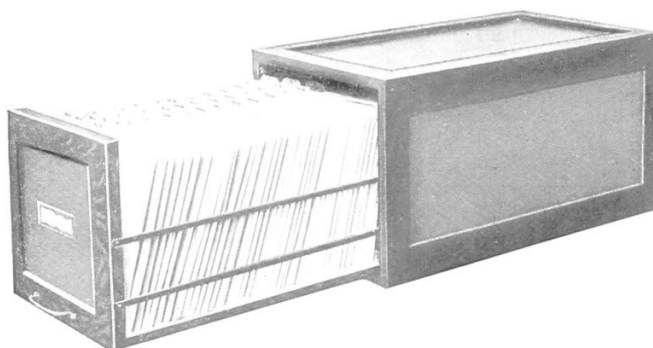

BUILT-TO-ENDURE—WILL LAST FOREVER.

GLOBE-WERNICKE TRANSFER STORAGE CASES can be arranged in batteries high or low as necessity dictates. While the two illustrations herewith show STEEL STORAGE CASES, the ALL WOOD Cases or the WOOD AND TARBOARD Cases can likewise be built up to any desired height in compact formation.

TRANSFER OR STORAGE CASE of HARDWOOD FRAME and TARBOARD PANELS

In Three Standard Sizes

LETTER SIZE

No. 791 V. L.—12 $\frac{7}{8}$ in. high by 14 $\frac{1}{8}$ in. wide
No. 791 Base.

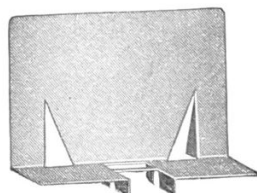

CAP or LEGAL SIZE

No. 792 V. C.—12 $\frac{7}{8}$ in. high by 17 $\frac{1}{8}$ in. wide
No. 792 Base.

BILL SIZE

No. 790 V. B.—11 $\frac{5}{8}$ in. high by 11 $\frac{5}{8}$ in. wide
No. 790 Base.

This case has one advantage over other Transfer Cases, IT IS LIGHT IN WEIGHT. Filled with as many papers as any other transfer case will hold, it is much more easily carried from the side of an active file to a storage room. Also, it is lower in price. These two factors have made it popular.

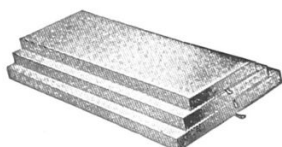

The 191 Steel Follower and Rod will fit all Storage Cases in any of three sizes. Wood Follower and Rod supplied when so ordered.

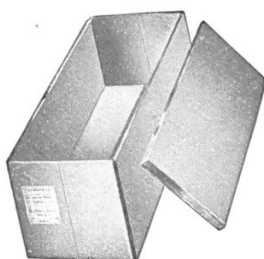

Leg Base made of wood, 7 inches in height and intended to be placed under Globe-Wernicke Vertical Storage Cases Nos. 790, 791 and 792.

COLLAPSIBLE VERTICAL STORAGE OR TRANSFER CASES

Made of heavy tarboard, wood bottom and all parts strongly reinforced. A strong and serviceable case.
Patented September 18, 1906.

Occupies little storage space

No. 8 ADJUSTABLE PERFORATOR

Patented Sept. 7, 1915
Additional patent applied for

BASE. The base is made of 18-gauge cold rolled steel, formed and acetylene welded at the corners. Beautifully finished in dull Olive Green enamel. Rubber feet under corners.

BEARINGS. Two bearings, one at either end of the operating shaft, are securely screwed through the base. These bearings are made of the best gray iron and accurately machined, thus holding the operating shaft in perfect alignment.

SHAFT. This is made of the best machinery steel, rolled especially for the purpose, and is strong and durable.

PUNCH HEADS. The punch heads are made of the best gray iron, accurately machined, all holes being drilled in one jig to insure perfect alignment and interchangeability. The punch which pierces the paper and the shaft which operates the piercing punch are self-contained in the head, eliminating springing that would otherwise occur. The heads are adjustable to any position on the shaft and are held in place by means of a set screw in the back of the head.

PUNCH and HOLDER. The punch is made of the best quality Stubb's Steel, the piercing end being ground concave to give shear action when cutting through the paper. The punch is held in a holder which drives it, but which permits it to float or adjust itself, thus insuring perfect alignment at all times. Punches supplied in the following diameters:

$\frac{7}{32}$ "	"	"	"	"	$\frac{5}{32}$ "	"	"
$\frac{1}{4}$ "	"	"	"	"	$\frac{3}{8}$ "	"	"
$\frac{9}{32}$ "	"	"	"	"	$\frac{1}{2}$ "	"	"
$\frac{11}{32}$ "	"	"	"	"	$\frac{5}{8}$ "	"	"

GAUGES. The graduated gauge is highly nickled. The graduations begin at the center of the gauge and read both right and left to facilitate the setting of the heads. The readings are $\frac{1}{2}$ " each way.

The side gauge is also graduated so that the distances from the holes to the edge of the paper can be gauged without the use of a rule. All gauging is done from the center of the perforator whether the sheets are large or small. Range of gauge $1\frac{1}{2}$ to 11; accommodating papers 3" to 22".

The depth gauge at the rear adjusts the distance from center of holes to binding edge of sheet. Minimum distance from center of holes to binding edge of sheet $\frac{1}{4}$ ". Maximum distance from center of holes to binding edge of sheet $\frac{9}{16}$ ".

All punch heads adjusted at one operation by simply pulling the depth gauge forward or pushing it backward until the desired margin is reached. No screw driver required.

HANDLE. The operating handle is made of the best quality malleable iron. It is mounted at the right of the perforator and is returned and held in normal position by concealed springs operating in the heads.

PAN. The pan for catching the punchings is made of sheet steel, being of ample size to hold a quantity of waste, thus avoiding frequent emptying. It is so constructed that it can be instantly removed.

CAPACITY. Greatest distance between outside holes $8\frac{1}{2}$ inches.

" number of heads that can be used - 13.

" width of sheet that can be gauged 22 inches,

" number of sheets (16 lb. bond) that can be pierced—30.

Smallest distance from center to center of holes— $\frac{11}{16}$ ".

PACKING. One to a box—weight 10 lbs. consisting of the following: Standard equipment.

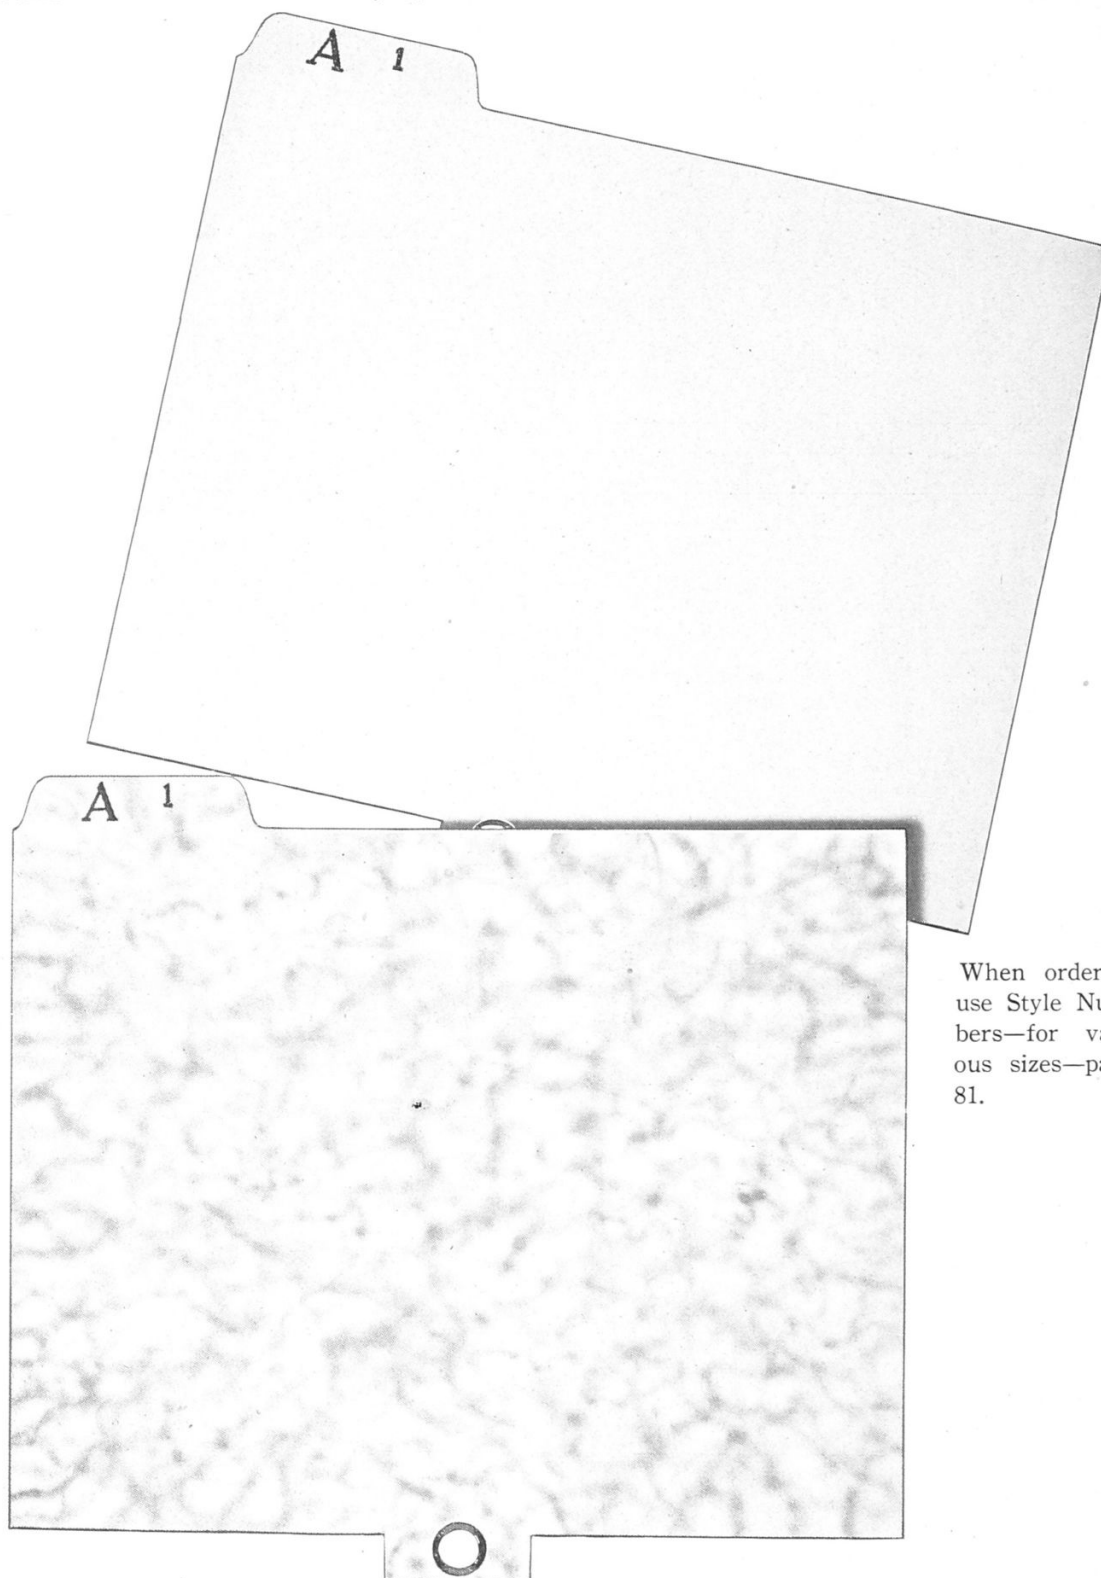

1—No. 8 Adjustable Perforator fitted with two heads perforating $\frac{1}{4}$ " round holes.

Unless otherwise specified the above equipment will be sent.

SEE PRICE LIST

GLOBE-WERNICKE MANILA GUIDES

The guide illustrated at the top is a Globe-Wernicke Manila made of the best Manila Index Board—durable and long lived. The tabs on Manila Guides are always “plain” that is, neither metal nor covered with celluloid.

When ordering use Style Numbers—for various sizes—page 81.

GLOBE-WERNICKE PRESSBOARD GUIDES

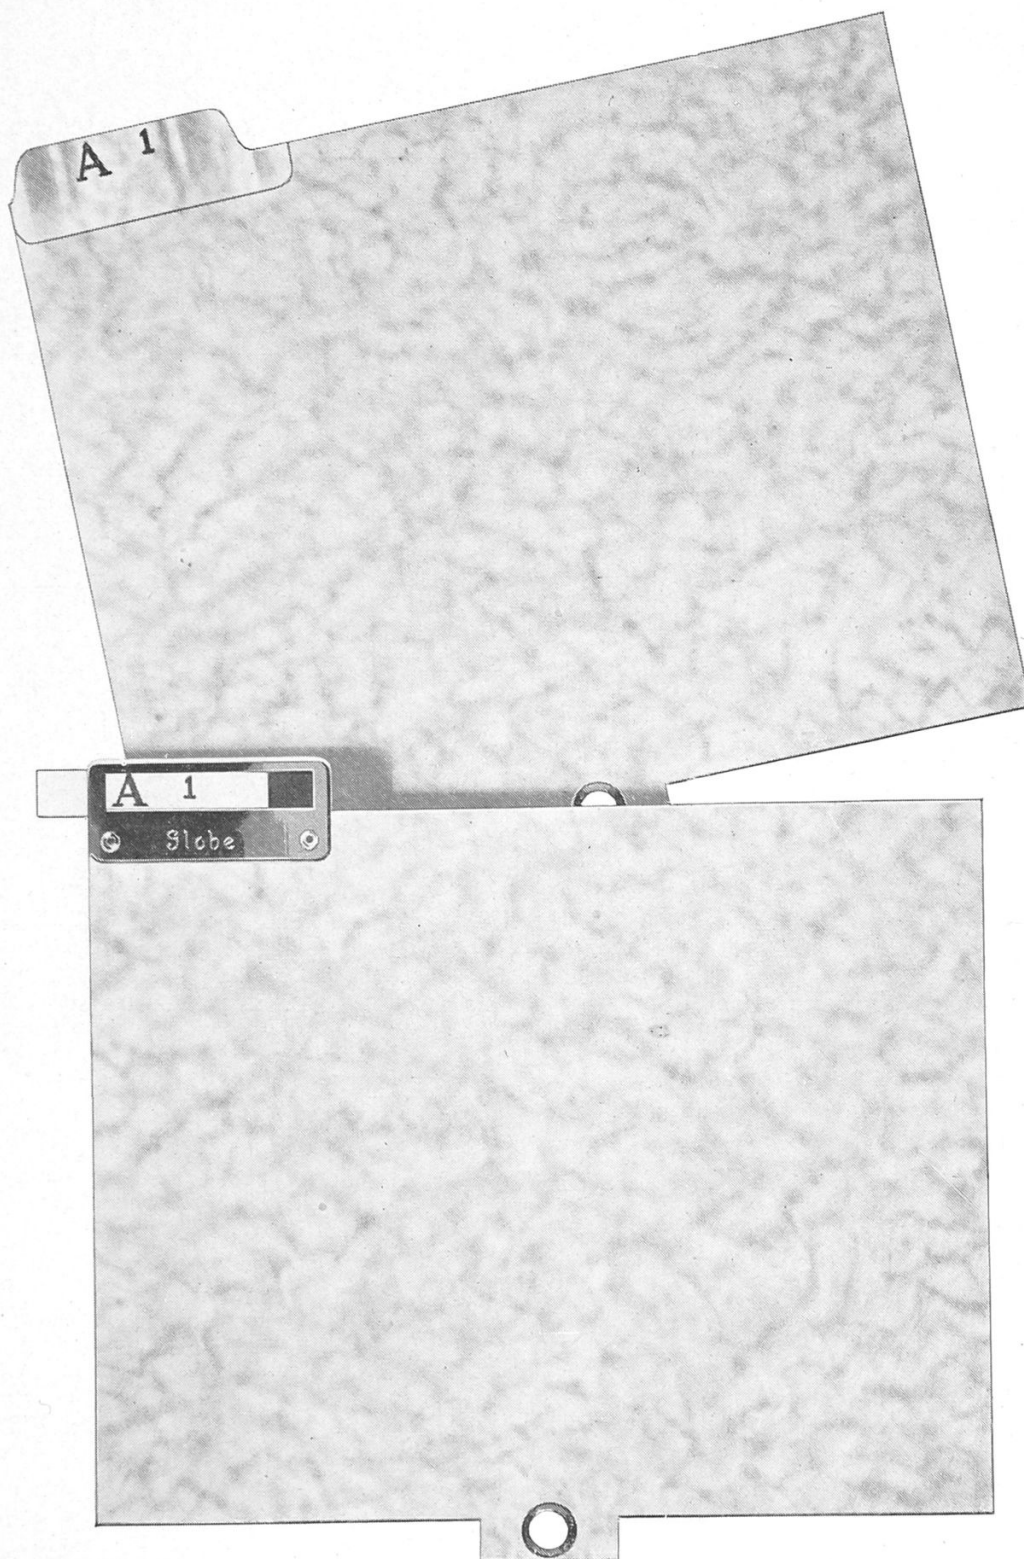

are made of the best grade of Genuine Pressboard of pearl gray color. The lower illustration shows a “Plain Tab,” that is, neither metal nor celluloid. For strength, durability and color this grade of pressboard cannot be surpassed. Two weights are furnished—“EXTRA HEAVY” and “MEDIUM HEAVY”.

When guides are printed only large readable type is used.

SEE PRICE LIST

GLOBE-WERNICKE CELLULOID PRESSBOARD GUIDES

The upper illustration on this page shows the same pressboard guide as opposite page but the tab is covered with celluloid to protect it from finger marks and wear. The celluloid keeps the lettering clean, strengthens the tabs, lengthens the life of the guide and makes the appearance of the file drawer attractive. Furnished in two weights, "EXTRA HEAVY" and "MEDIUM HEAVY".

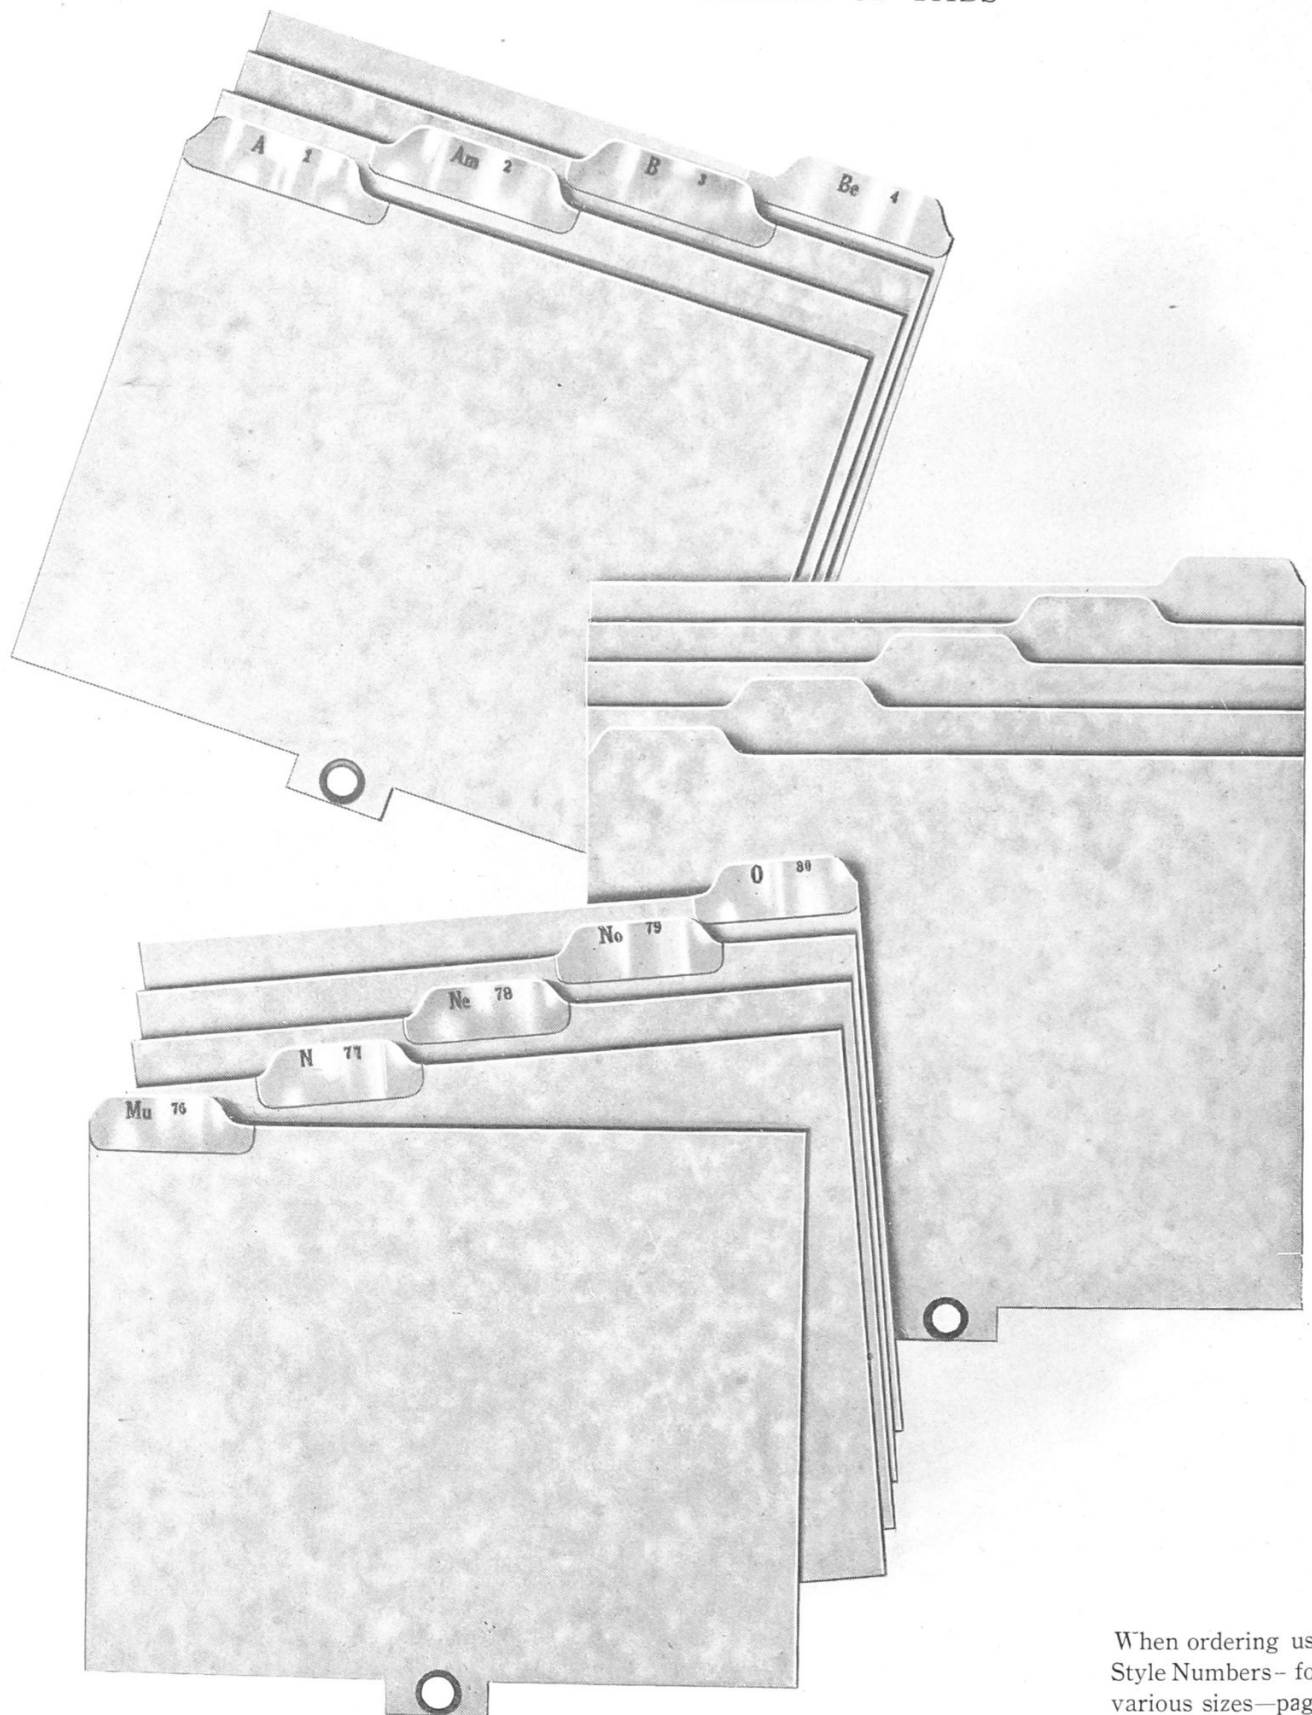

When ordering
use Style Num-
bers—for vari-
ous sizes—
page 61.

GLOBE-WERNICKE METAL TAB PRESSBOARD GUIDES

The lower illustration shows same guide but with metal tab. In this case the indexing label is inserted into the metal frame and can be easily and quickly changed. Pressboard guides with metal tabs will last almost indefinitely. Furnished in two weights "EXTRA HEAVY" and "MEDIUM HEAVY."

SEE PRICE LIST

VERTICAL GUIDES—POSITION OF TABS

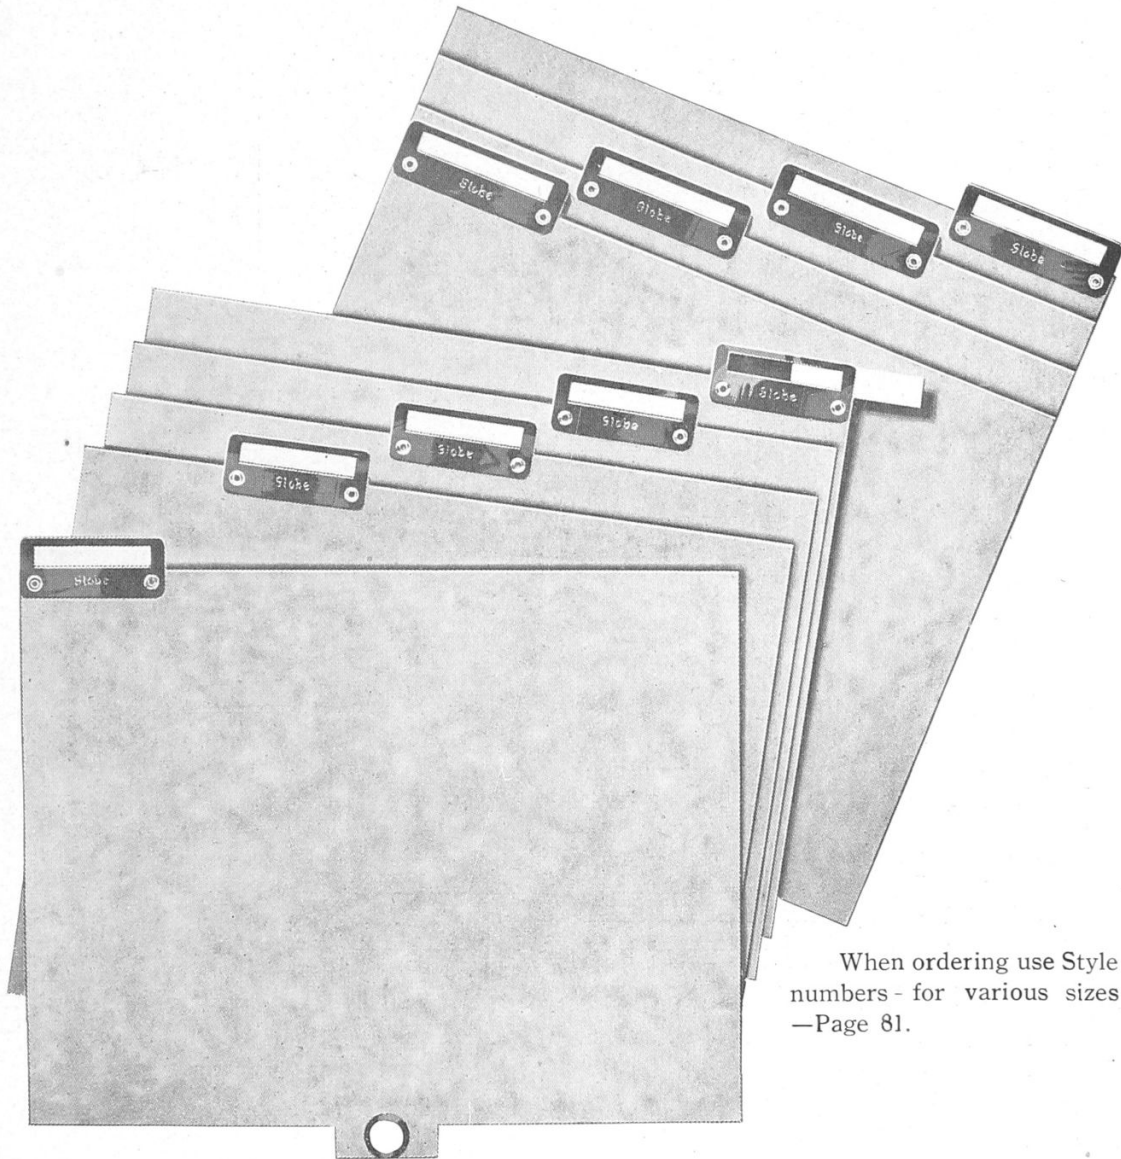

When ordering use
Style Numbers— for
various sizes—page
81.

Upper illustration, the tabs of the pressboard guides are cut "fourths" (i. e. four tabs distributed across width of guide) and covered with celluloid. The tabs of the center group are plain cut "fifths". The group at bottom has the tabs also cut "fifths" and covered with celluloid. All sizes of vertical guides have tabs distributed "fourths". Only letter size is furnished cut "fifths" as well as "fourths".

SEE PRICE LIST

VERTICAL GUIDES—POSITIONS OF METAL TABS

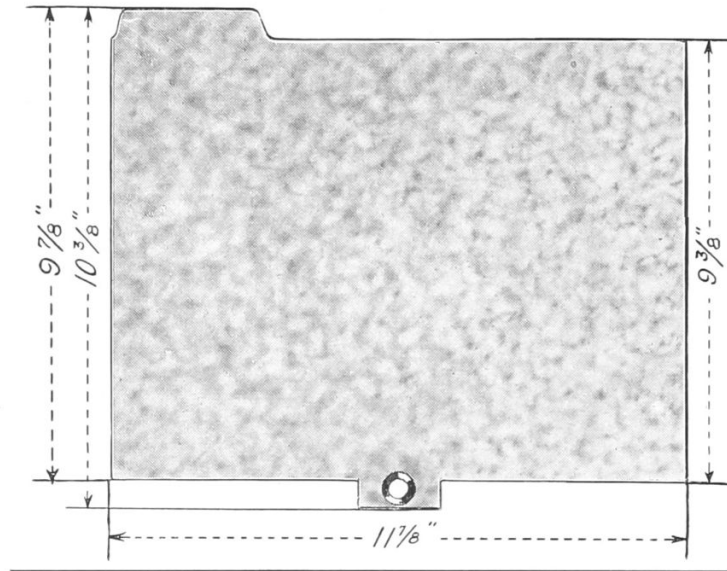

When ordering use Style numbers - for various sizes
—Page 81.

The LETTER Size Globe-Wernicke Guides are carried in stock with tabs arranged either fourths or fifths, that is either four tabs or five tabs are distributed across the width of guide as shown in pictures above. The upper illustration shows how metal tabs are distributed “fourths” and the lower how they are distributed “fifths”. The Cap Size are arranged fifths, Bill size and Ledger Size are arranged “fourths”.

VERTICAL GUIDES—GLOBE-WERNICKE ALPHABETICAL SUBDIVISIONS

ALPHABETICAL SUBDIVISIONS

The Globe Wernicke sets of indexed Guide Cards are the result of a recent thorough scientific research by a corps of experts and provisions have been made in each set for the proper indexing of the vast number of names that occur in the population. The standard sets are as follows:

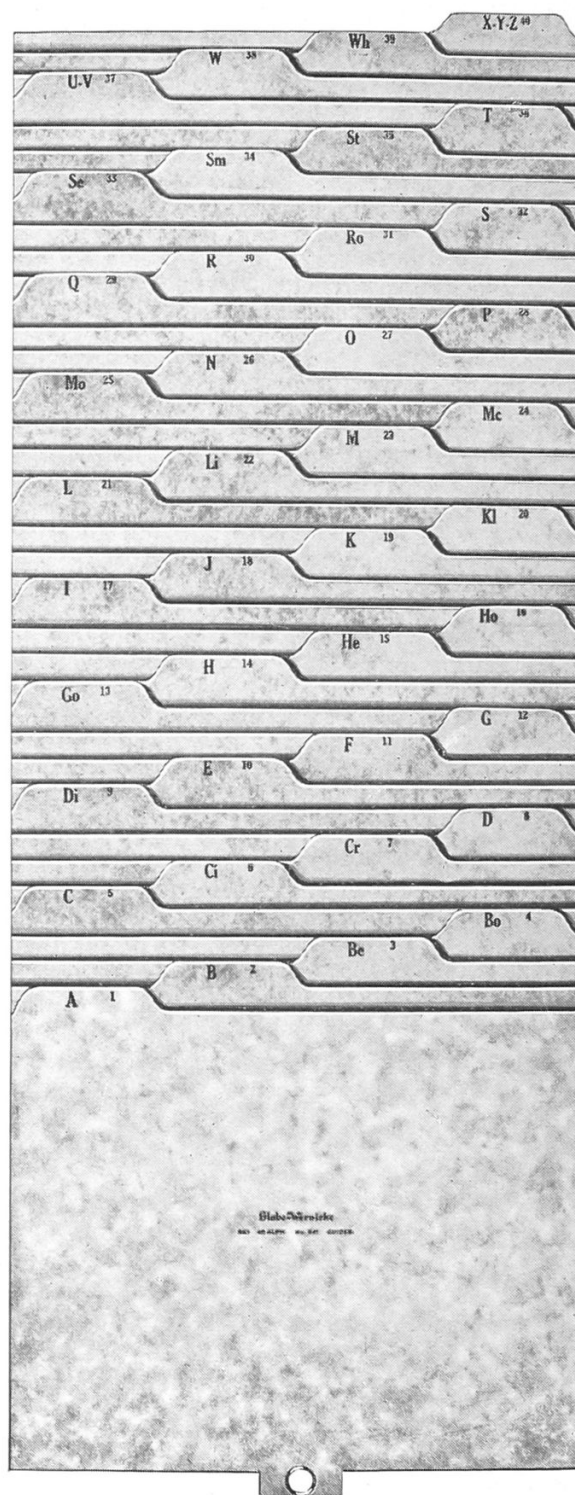

25 A-Z	120 A-Z	480 A-Z	2000 A-Z
40 "	160 "	720 "	3000 "
60 "	240 "	1000 "	4000 "
80 "	320 "	1500 "	5000 "

Consecutive numbers which also appear on the Guides will be found invaluable for coding and re-indexing. All sets may be augmented by the insertion of surnames, subdivided as many times as desired.

25 A-Z

This is the simplest form of the alphabet, one guide to each letter, except X and Y, which are combined.

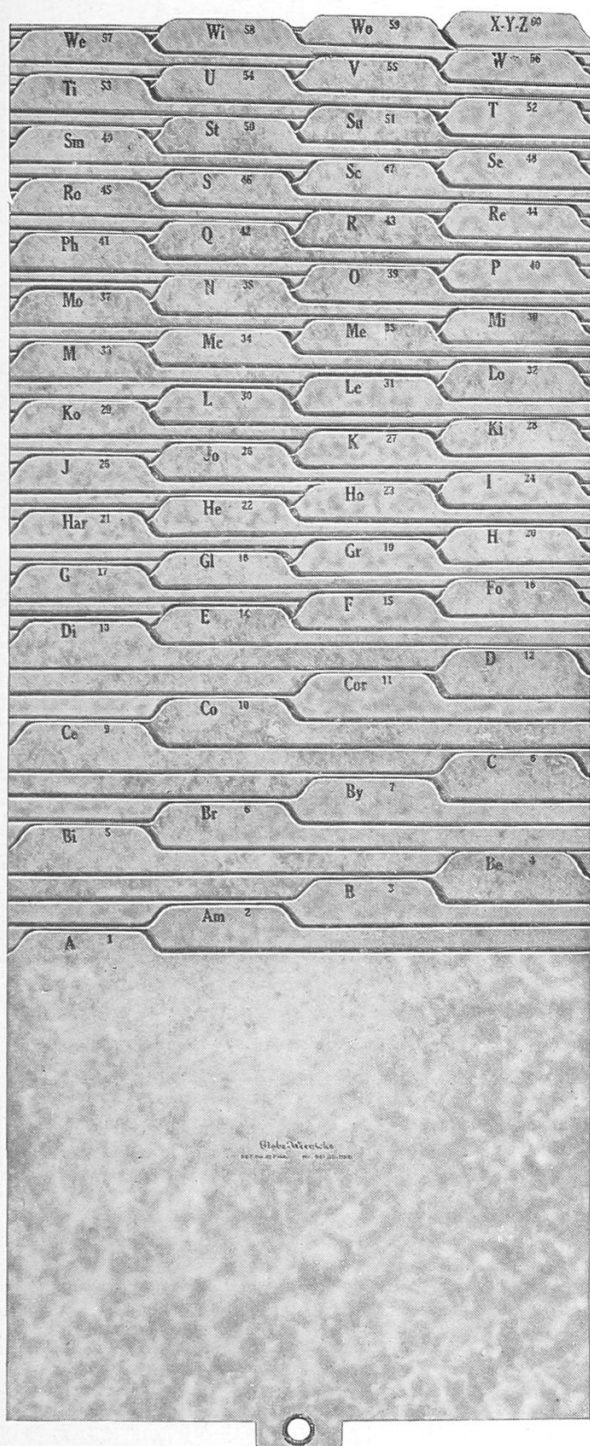

40 A-Z

Illustrating how the alphabet is subdivided for forty guides, numbered consecutively. Notice for the letter "A" only one guide is used while "B" is subdivided on three guides.

Usually 40 guides are used in one Globe-Wernicke Vertical File of 28 inch depth for indexing up to 6000 letters—the capacity of a single drawer.

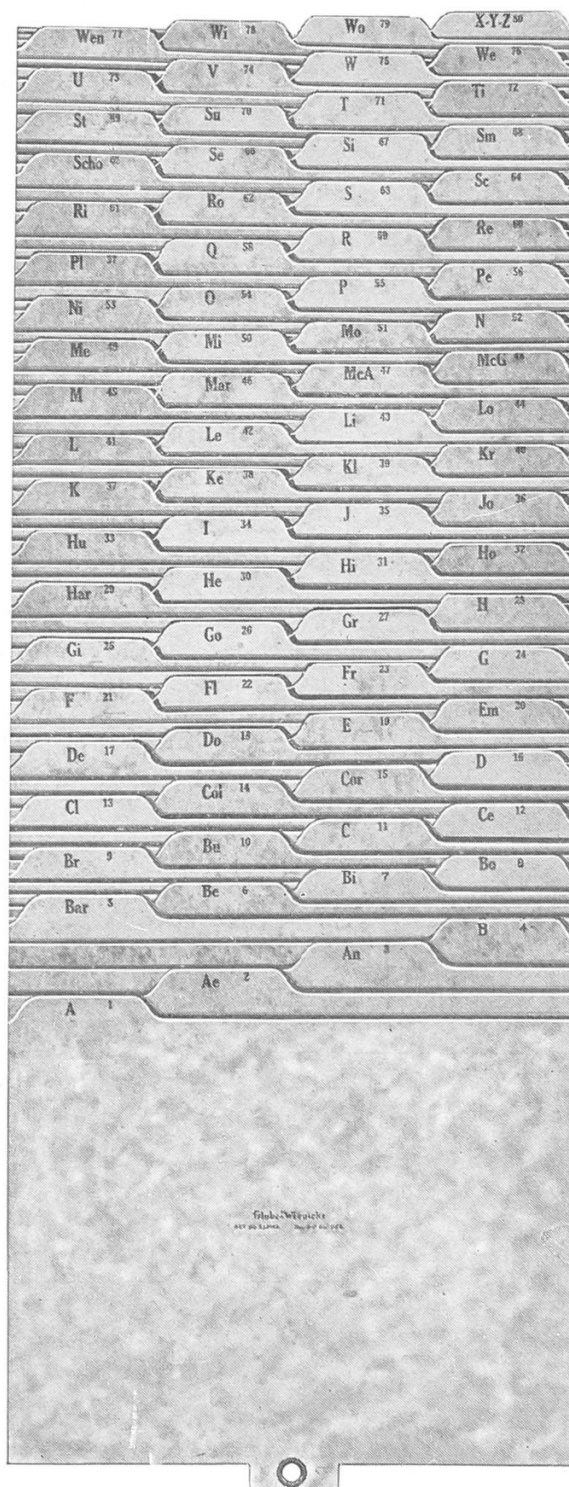

SEE PRICE LIST

GLOBE-WERNICKE ALPHABETICAL SUBDIVISIONS

60 A-Z

60 Guides with 60 subdivisions of the alphabet. Notice two guides are used for the letter "A" while five are used for the letter "B". The subdivisions are so arranged that about an equal number will be filed between each two guides.

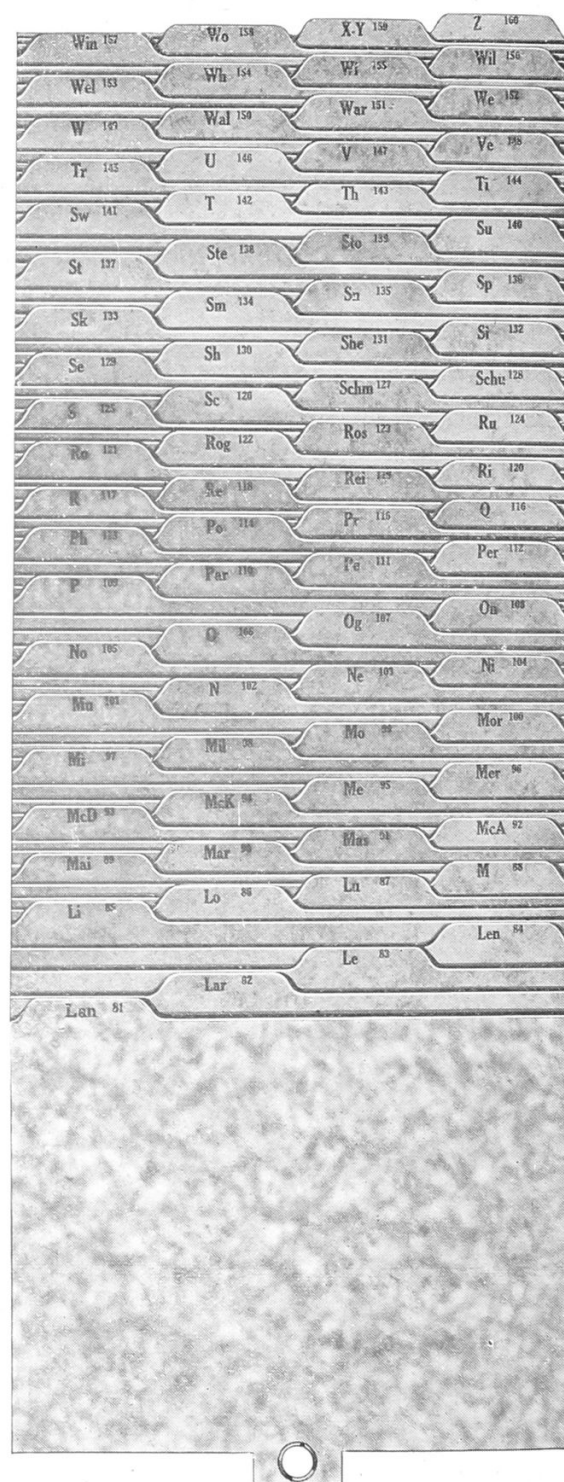

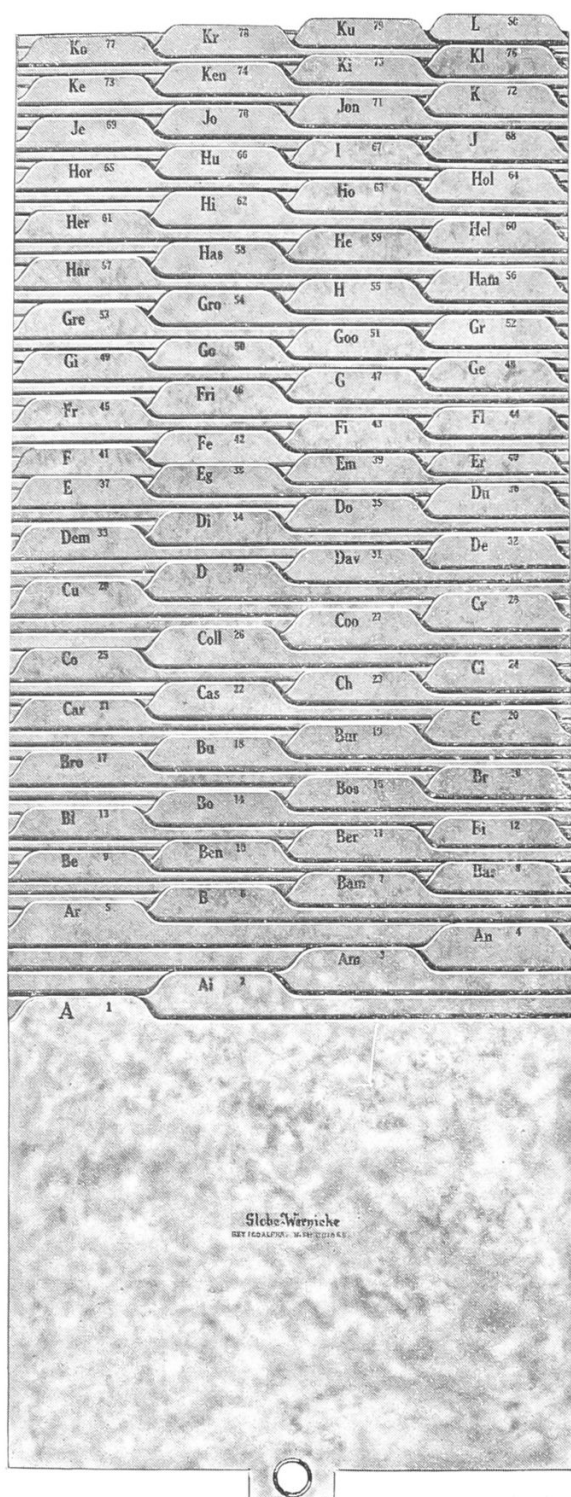

80 A-Z

Here 80 Guides are used with 80 subdivisions of the alphabet suitable for two 28" depth Globe-Wernicke files. The letter "A" is now subdivided on 3 guides while "B" is subdivided on 7 guides.

SEE PRICE LIST

VERTICAL GUIDES—GLOBE-WERNICKE ALPHABETICAL SUBDIVISIONS

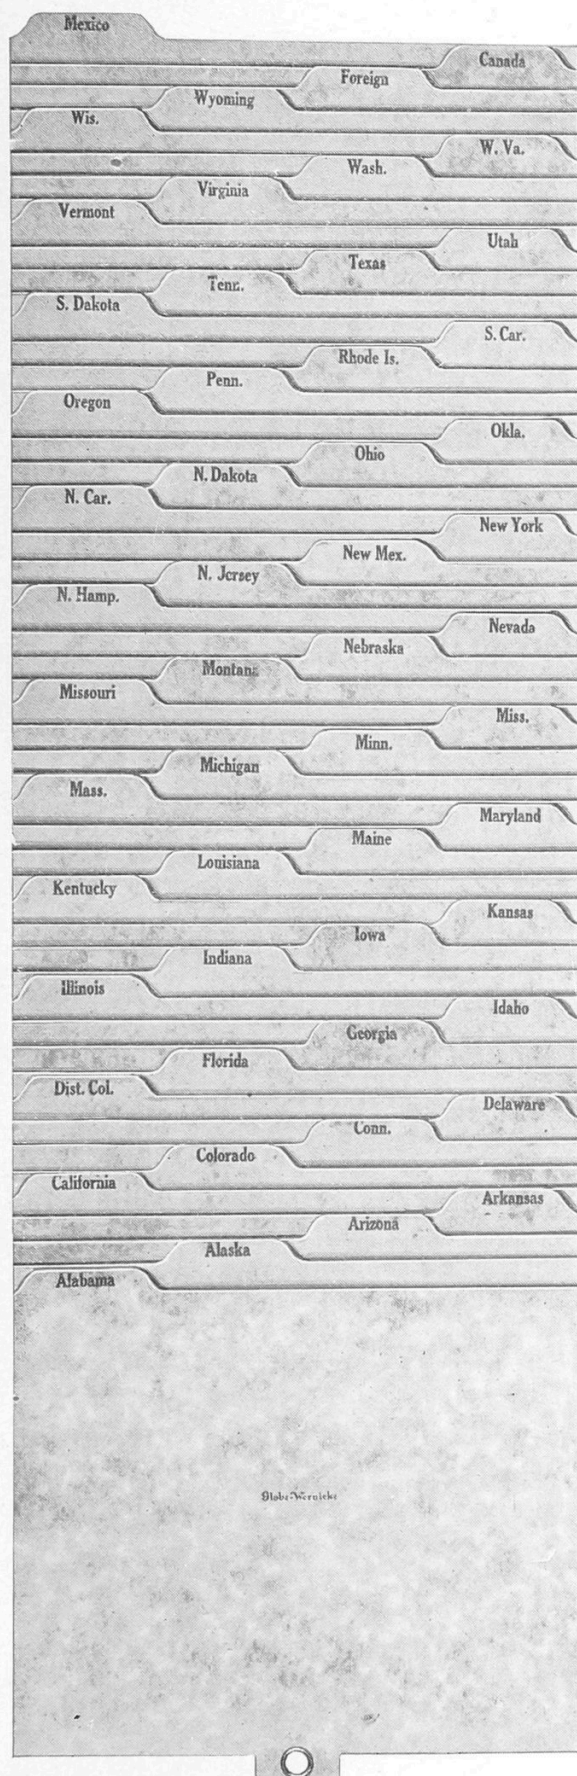

160 A-Z

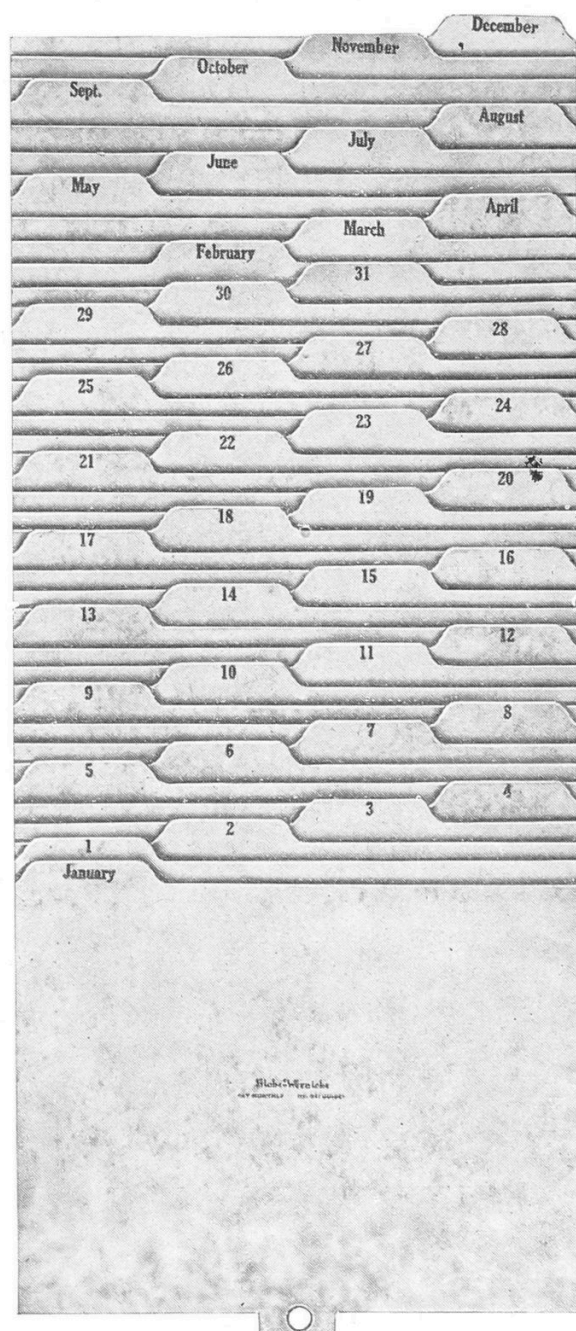

160 Guides having 160 subdivisions of the alphabet. The index becomes more speedy and accurate with the greater number of subdivisions. This particular set of the larger subdivisions is shown because it is suitable for a single four drawer upright as there are usually forty guides used in one drawer or 160 in four drawers.

SEE PRICE LIST

GLOBE-WERNICKE VERTICAL GUIDES

A Set of State Guides (52)

MONTHLY GUIDES (12) and DAILY GUIDES (31)

This illustration shows how the Monthly Sets and the Daily Sets may be combined when used for Follow-up and Tickler Systems. The correspondence can then be placed in back of the date set for following up. When a cross index is needed to locate the correspondence in case an answer is received in the meanwhile, it is customary to use a small 3x5 Alphabetical Outfit.

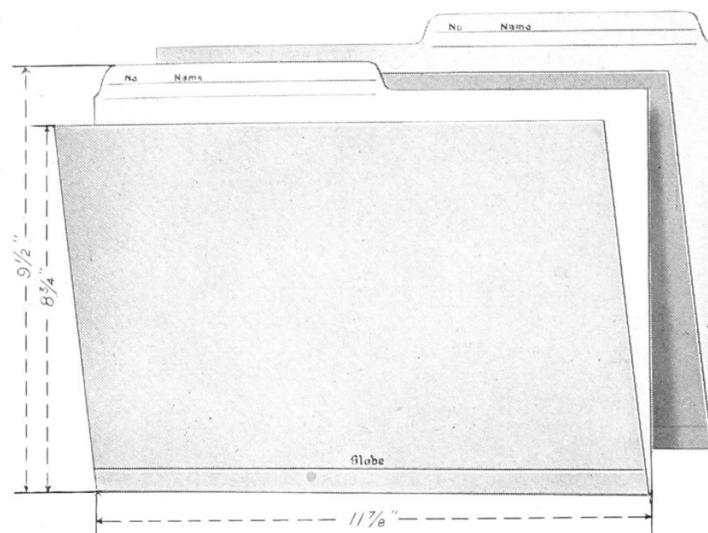

When filing geographical correspondence, the guides may be used in the following manner. See Globe-Wernicke Vertical Guide.

SIGNATURE RULING C

CARD INDEX GUIDES

SIZES:—Guide Cards are cut for 3x5, 4x6, and 5x8 inch cards, the tabs extending $\frac{5}{16}$ of an inch above the upper edge. Unless otherwise specified, we send 3x5 inch Guides.

GRADES:—Card Index Guides either BLANK or INDEXED are furnished in THREE GRADES, viz.:—

—STANDARD GRADE HEAVYWEIGHT—

Made for hard wear and long service, double ply, extra heavy linen ledger and extra fine writing surface. Thickness, 20 inches to the thousand.

—STANDARD GRADE MEDIUM WEIGHT—

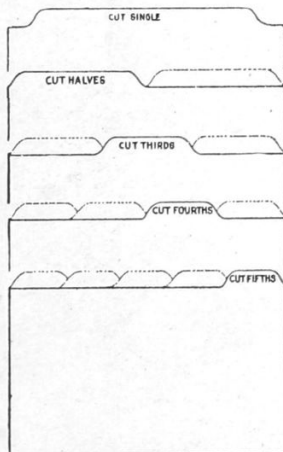

Same as Heavy Weight but one ply. Thickness 15 inches to the thousand.

—COMMERCIAL GRADE—

Medium grade, a strong, stiff texture. Thickness, 19 inches to the thousand.

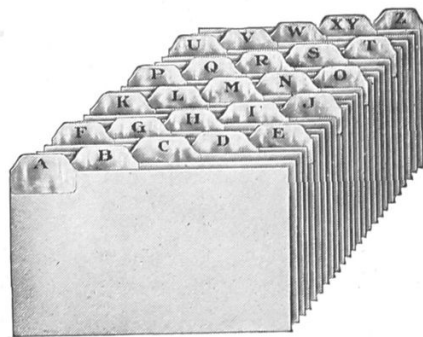

Unless otherwise specified, we send Standard Grade Heavy-Weight.

COLORS:—Standard Grade Heavy-Weight BLUE, BUFF, SALMON
Standard Grade Medium Weight BLUE, BUFF, SALMON,
Commercial Grade—BLUE, BUFF, SALMON

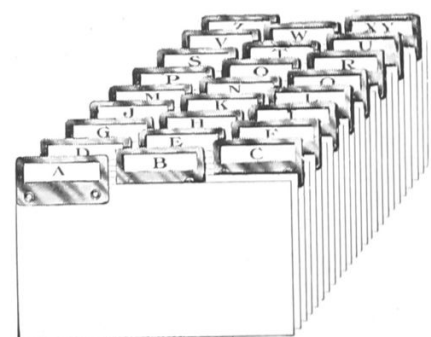

The tabs are cut single, halves, thirds, fourths and fifths

Unless otherwise specified, we send Guides, distributed Thirds.

Alphabetical Guides
with Celluloid Tabs.

Celluloid Tabs are supplied only in the Standard Grade Heavy Weight and in Buff Color. The Celluloid protects the printed index, keeps the tab bright and clean and prevents splitting. Celluloid Tabs with dead writing surface supplied on special order.

Alphabetical Guides with metal label holders.

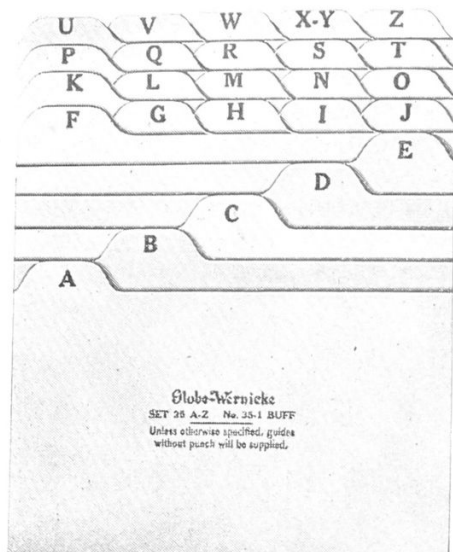

Metal Tabs supplied only on Standard Grade Heavy-Weight and in Buff Color. Polished metal is used which will not corrode.

Metal Tabs add to the rigidity and permanence of the guides. Fitted with white labels, which can be renewed as frequently as desired. Sets of printed slips furnished in envelopes when ordered with Guides. When colors are wanted colored celluloid inserts the size of the white labels are supplied. These are placed before the white labels in the metal holder.

SEE PRICE LIST

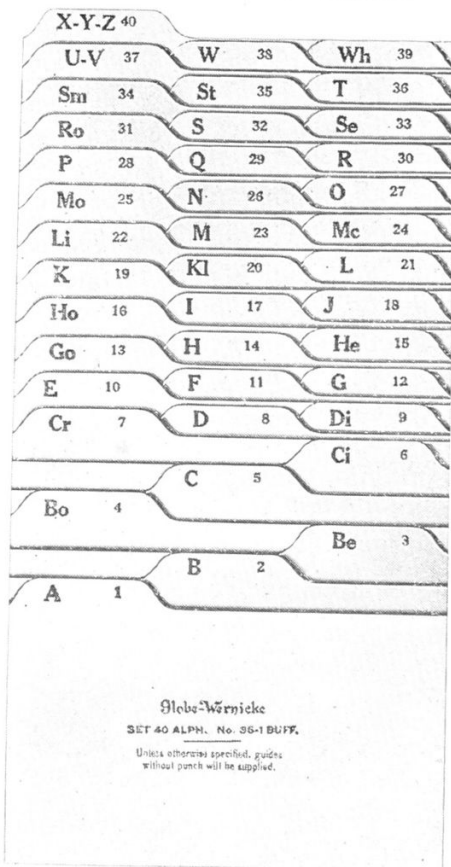

CARD INDEX GUIDES

Alphabetical Guides Are Carried in Stock in BUFF, other Colors to order.

25 A-Z

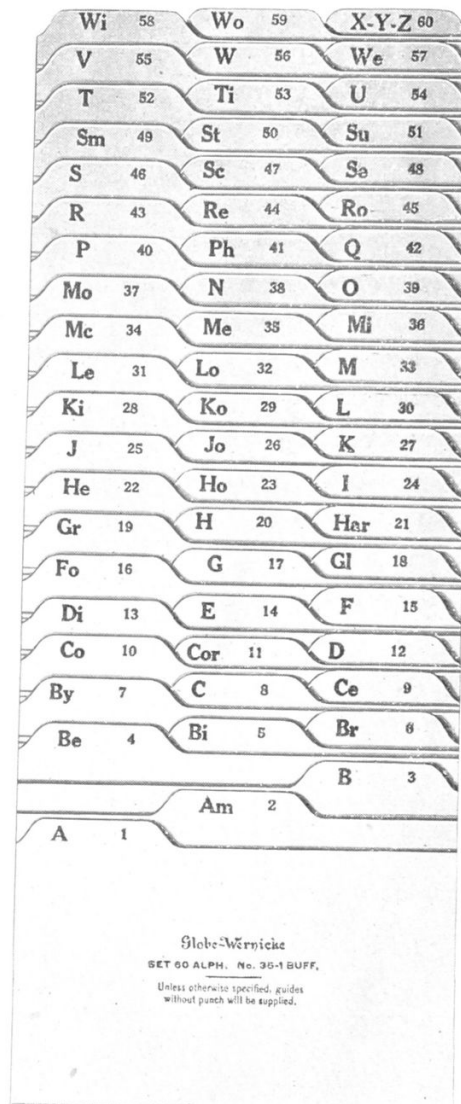

25 Subdivisions of Alphabet on Card Index Guides. Note the tabs are distributed "fifths" across width of guide.

40 A-Z

40 Subdivision of Alphabet on C. I. Guides.

Note the tabs on 40 subdivisions and over are distributed "thirds."

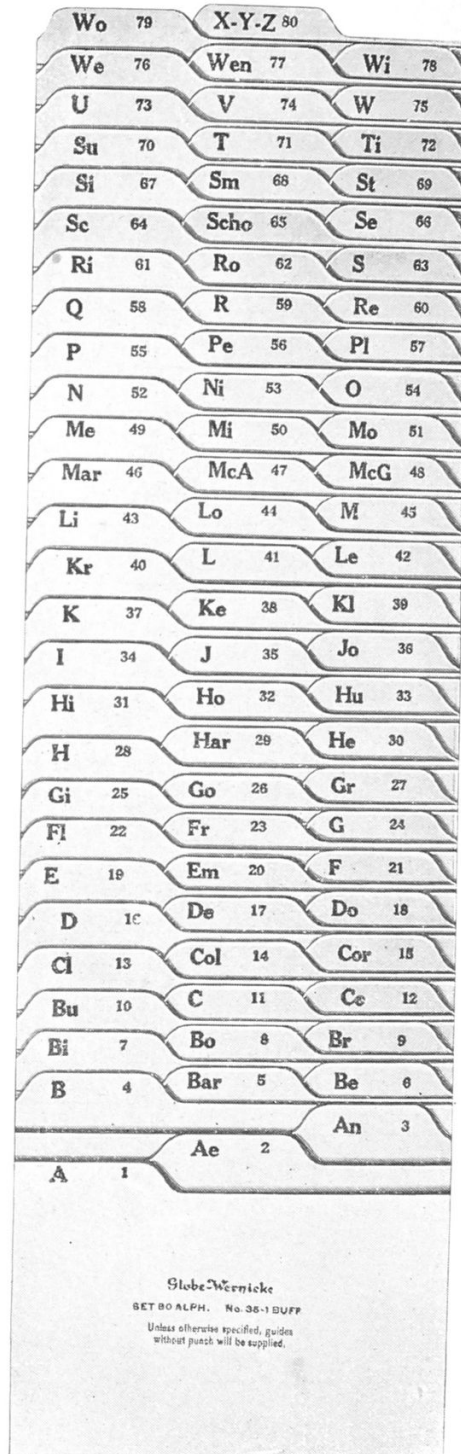

60 A-Z

60 Subdivisions of Alphabet on C. I. Guides. Tabs distributed "thirds"

Notice the guides are numbered consecutively in the case of 40 subdivisions and over. This is valuable in many ways especially when refiling cards.

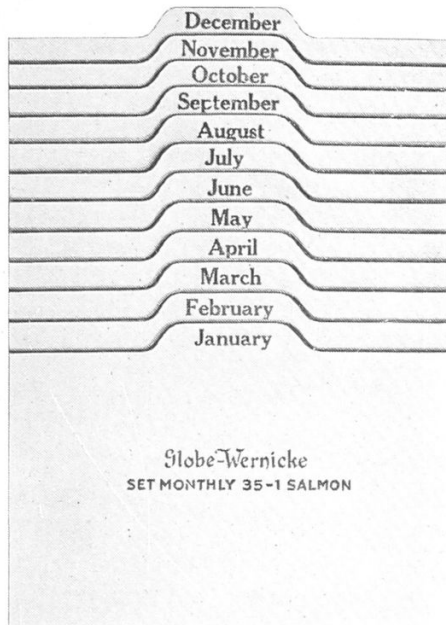

The subdivisions of the alphabet were arrived at scientifically so that an equal number of cards will alphabetically be filed between each two guides.

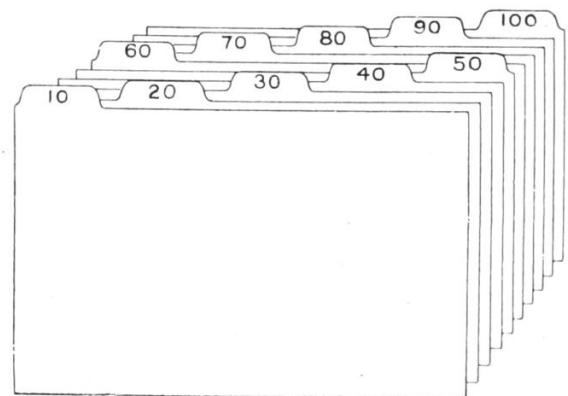

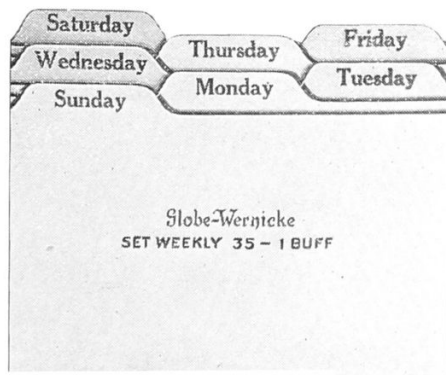

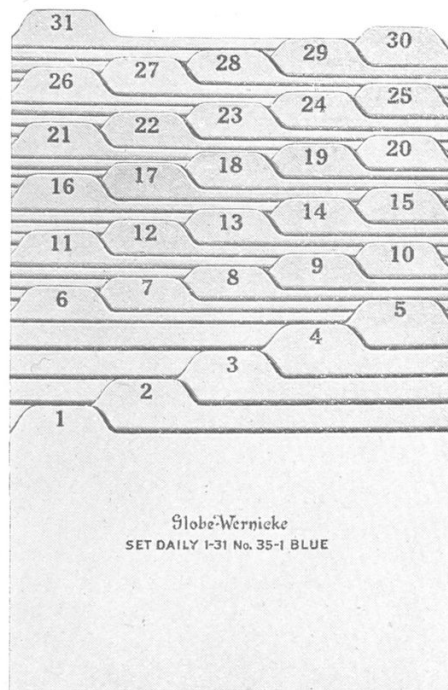

80 A-Z

80 Subdivisions of Alphabet on C. I. Guides. Tabs distributed "thirds."

GUIDES FOR RECORD CARDS

Card index guides indexed by months are used mostly in Follow-up systems in connection with daily guides shown below.

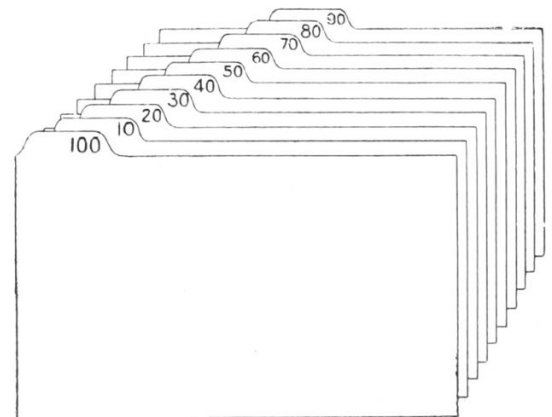

NUMERICAL GUIDES

Numerical Guides are not carried in stock, but furnished promptly to order.

They are numbered in intervals of 10, from 10 up.

This illustration shows the kind of Guide that will be supplied in the absence of other instructions—that is, cut fifths, salmon color, no punch.

If punch is desired, specify style of perforation, see diagram, page 100.

A Set of 5x8 Numerical Ledger Guides

NUMERICAL LEDGER GUIDES

Tabbed Left of Center

These guides are used extensively with ledger cards having decimal tabs.

Nine Guides in salmon (10-90), with end Guide in blue, compose a set.

Made only in No. 1 Grade—no punch.

If punch is desired, specify style of perforation, see diagram, page 100.
